

Statement of Additional Information
April 1, 2017

CENTER COAST MLP FOCUS FUND
a series of Investment Managers Series Trust

Class A Shares (CCCAX), Class C Shares (CCCCX), Class T Shares (CCCDX)
and Institutional Class Shares (CCCNX)

This Statement of Additional Information (“SAI”) is not a prospectus, and it should be read in conjunction with the Prospectus dated April 1, 2017, as may be amended from time to time, of the Center Coast MLP Focus Fund (the “Fund”), a series of Investment Managers Series Trust (the “Trust”). Liberty Street Advisors, Inc. (the “Advisor”) is the investment advisor to the Fund. Center Coast Capital Advisors, LP (the “Sub-Advisor”) is the sub-advisor to the Fund. A copy of the Fund’s Prospectus may be obtained by contacting the Fund at the address or the telephone number below. The Fund’s Annual Report to shareholders for the fiscal year ending November 30, 2016, is incorporated by reference herein. A copy of the Fund’s Annual Report can be obtained by contacting the Fund at the address or telephone number specified below.

THE TRUST AND THE FUND

The Trust is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on February 15, 2005. The Trust currently consists of several other series of shares of beneficial interest. This SAI relates only to the Fund and not to the other series of the Trust.

The Trust is registered with the U.S. Securities and Exchange Commission (“SEC”) as an open-end management investment company. Such a registration does not involve supervision of the management or policies of the Fund. The Prospectus of the Fund and this SAI omit certain of the information contained in the Registration Statement filed with the SEC. Copies of such information may be obtained from the SEC upon payment of the prescribed fee.

The Fund is a non-diversified mutual fund, which means it is not subject to the diversification requirements under the Investment Company Act of 1940, as amended (the “1940 Act”). Under the 1940 Act, a diversified fund may not, with respect to 75% of its total assets, invest more than 5% of its total assets in the securities of one issuer (and in not more than 10% of the outstanding voting securities of an issuer), excluding cash, Government securities, and securities of other investment companies. Although the Fund is not required to comply with the above requirement, the Fund intends to diversify its assets to the extent necessary to qualify for tax treatment as a regulated investment company under the Internal Revenue Code of 1986, as amended (the “Code”).

The Fund offers four classes of shares: Class A, Class C, Class T and Institutional Class. As of the date of this SAI, Class T Shares are not currently available for purchase. Other classes may be established from time to time in accordance with the provisions of the Trust’s Agreement and Declaration of Trust (the “Declaration of Trust”). Each class of shares of the Fund generally is identical in all respects except that each class of shares is subject to its own distribution expenses and minimum investments. Each class of shares also has exclusive voting rights with respect to its distribution fees.

INVESTMENT STRATEGIES, POLICIES AND RISKS

The discussion below supplements information contained in the Fund’s Prospectus pertaining to the investment policies of the Fund.

PRINCIPAL INVESTMENT STRATEGIES, POLICIES AND RISKS

Master Limited Partnerships (MLPs)

An MLP is an entity receiving partnership taxation treatment under the Internal Revenue Code of 1986, as amended (the “Code”), and the interests or “units” of which are traded on securities exchanges like shares of corporate stock. A typical MLP consists of a general partner and limited partners; however, some entities receiving partnership taxation treatment under the Code are established as limited liability companies. The general partner manages the partnership; has an ownership stake in the partnership (typically a 2% general partner equity interest and additional common units and subordinated units); and in many cases is eligible to receive an incentive distribution. The limited partners provide capital to the partnership, have a limited (if any) role in the operation and management of the partnership, and are entitled to receive cash distributions with respect to their units. An MLP typically pays an established minimum quarterly distribution to common unit holders, as provided under the terms of its partnership agreement. Common units have arrearage rights in distributions to the extent that the MLP fails to make minimum quarterly distributions. Once the MLP distributes the minimum quarterly distribution to common units, subordinated units then are entitled to receive distributions of up to the minimum quarterly distribution, but have no arrearage rights. At the discretion of the general partner, any distributable cash that exceeds the minimum quarterly distribution that the MLP distributed to the common and subordinated units is then distributed to both common and subordinated units, typically on a pro rata basis. Incentive distributions are often paid to the general partner such that as the distribution to limited partnership interests increases, the general partner may receive a proportionately larger share of the total

distribution. Incentive distributions are designed to encourage the general partner, who controls and operates the partnership, to maximize the partnership's cash flow and increase distributions to the limited partners.

To qualify for treatment as a partnership for U.S. federal income tax purposes, an MLP must receive at least 90% of its income from qualifying sources such as interest, dividends, real estate rents, gain from the sale or disposition of real property, income and gain from certain mineral or natural resources activities, income and gain from the transportation or storage of certain fuels, and, in certain circumstances, income and gain from commodities or futures, forwards and options with respect to commodities, and gain from the sale or other disposition of a capital asset held for the production of such income. Mineral or natural resources activities include exploration, development, production, mining, processing, refining, marketing and transportation (including pipelines), of oil and gas, minerals, geothermal energy, fertilizer, timber or industrial source carbon dioxide. Currently, most MLPs operate in the energy, natural resources, or real estate sectors. The Fund anticipates that a substantial portion of the MLP entities in which the Fund invests will be engaged primarily in the energy industry. The Fund may, however, invest in MLP entities in any sector of the economy. Due to their federal income tax treatment as partnerships, MLPs generally do not pay income taxes, but investors holding interests in MLPs are generally subject to tax on their shares of the MLPs' income and gains.

Holders of MLP units are exposed to a remote possibility of liability for all of the obligations of that MLP in the event that a court determines that the rights of the unit holders to take certain action under the limited partnership agreement would constitute "control" of the business of that MLP, or if a court or governmental agency determines that the MLP is conducting business in a state without complying with the limited partnership statute of that state.

Certain MLPs in which the Fund may invest depend upon their parent or sponsor entities for the majority of their revenues. If their parent or sponsor entities were to fail to make such payments or satisfy their obligations, the revenues and cash flows of such MLPs and the ability of such MLPs to make distributions to unit holders, such as the Fund, would be adversely affected.

Small- and Mid-Cap Stocks

The Fund may invest in stock of companies with market capitalizations that are small compared to other publicly traded companies. Investments in larger companies present certain advantages in that such companies generally have greater financial resources, more extensive research and development, manufacturing, marketing and service capabilities, and more stability and greater depth of management and personnel. Investments in smaller, less seasoned companies may present greater opportunities for growth but also may involve greater risks than customarily are associated with more established companies. The securities of smaller companies may be subject to more abrupt or erratic market movements than larger, more established companies. These companies may have limited product lines, markets or financial resources, or they may be dependent upon a limited management group. Their securities may be traded in the over-the-counter market or on a regional exchange, or may otherwise have limited liquidity. As a result of owning large positions in this type of security, the Fund is subject to the additional risk of possibly having to sell portfolio securities at disadvantageous times and prices if redemptions require the Fund to liquidate its securities positions. In addition, it may be prudent for the Fund, as its asset size grows, to limit the number of relatively small positions it holds in securities having limited liquidity in order to minimize its exposure to such risks, to minimize transaction costs, and to maximize the benefits of research. As a consequence, as the Fund's asset size increases, the Fund may reduce its exposure to illiquid small capitalization securities, which could adversely affect performance.

The Fund may also invest in stocks of companies with medium market capitalizations (i.e., mid-cap companies). Such investments share some of the risk characteristics of investments in stocks of companies with small market capitalizations described above, although mid cap companies tend to have longer operating histories, broader product lines and greater financial resources and their stocks tend to be more liquid and less volatile than those of smaller capitalization issuers.

OTHER INVESTMENT STRATEGIES, POLICIES AND RISKS

EQUITY SECURITIES

Common Stock

Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's stock price.

The fundamental risk of investing in common stock is that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. While common stocks have historically provided greater long-term returns than preferred stocks, fixed-income and money market investments, common stocks have also experienced significantly more volatility than the returns from those other investments.

Preferred Stock

Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and the recovery of investment in the event a company is liquidated, although preferred stock is usually subordinate to the debt securities of the issuer. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest rates. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline. Preferred stock may have mandatory sinking fund provisions, as well as call/redemption provisions prior to maturity, a negative feature when interest rates decline. In addition, the Fund may receive stocks or warrants as result of an exchange or tender of fixed income securities.

The Fund's investment in preferred stocks is subject to the credit risk related to the financial condition of the issuers of those securities. Credit ratings attempt to evaluate the safety of principal and dividend or interest payments and do not evaluate the risks of fluctuations in market value.

Initial Public Offerings

The Fund may purchase securities of companies in initial public offerings. Special risks associated with these securities may include limited numbers of shares available for trading, unseasoned trading, lack of investor knowledge of the companies and the companies' limited operating histories. These factors may contribute to substantial price volatility for the shares of these companies. The limited number of shares available for trading in some initial public offerings may make it more difficult for the Fund to buy or sell significant amounts of shares without an unfavorable impact on prevailing market prices. Some companies whose shares are sold through initial public offerings are involved in relatively new industries or lines of business, which may not be widely understood by investors. Some of these companies may be undercapitalized or regarded as developmental stage companies without revenues or operating income, or the near-term prospects of achieving them.

DEBT SECURITIES

U.S. Government Obligations

The Fund may invest in U.S. Government securities. U.S. Government securities include (a) Treasury bills (maturity of one year or less), U.S. Treasury notes (maturity of one to ten years) and U.S. Treasury bonds (maturities generally greater than ten years) and (b) obligations issued or guaranteed by U.S. government agencies or instrumentalities which are supported by any of the following: (i) the full faith and credit of the U.S. Government (such as Government National Mortgage Association ("Ginnie Mae") certificates); (ii) the right of the issuer to borrow an amount limited to a specific line of credit from the U.S. Government (such as obligations of

the Federal Home Loan Banks); (iii) the discretionary authority of the U.S. Government to purchase certain obligations of agencies or instrumentalities (such as securities issued by Fannie Mae (formally known as Federal National Mortgage Association)); or (iv) only the credit of the instrumentality (such as securities issued by Freddie Mac (formally known as Federal Home Loan Mortgage Corporation)).

U.S. Government securities also include issues by non-governmental entities (like financial institutions) that carry direct guarantees from U.S. government agencies as part of government initiatives in response to the 2008 market crisis or otherwise.

In the case of U.S. Government obligations backed solely by the issuing or guaranteeing agency or instrumentality itself, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. Government would provide financial support to its agencies or instrumentalities, including government-sponsored enterprises, if it is not obligated to do so.

Neither the U.S. Government nor any of its agencies or instrumentalities guarantees the market values of the securities it issues. Therefore, the market values of such securities will fluctuate in response to changes in interest rates. As a general matter, the values of debt instruments, including U.S. Government obligations, decline when market interest rates increase and rise when market interest rates decrease. Certain types of U.S. Government obligations are subject to fluctuations in yield or value due to their structure or contract terms.

As of September 7, 2008, the Federal Housing Finance Agency (“FHFA”) has been appointed as the conservator of Freddie Mac and Fannie Mae for an indefinite period. In accordance with the Federal Housing Finance Regulatory Reform Act of 2008 and the Federal Housing Enterprises Financial Safety and Soundness Act of 1992, as conservator the FHFA will control and oversee these entities until the FHFA deems them financially sound and solvent. During the conservatorship, each entity’s obligations are expected to be paid in the normal course of business. Although no express guarantee exists for the debt or mortgage-backed securities issued by these entities, the U.S. Department of Treasury, through a secured lending facility and a senior preferred stock purchase agreement, has attempted to enhance the ability of the entities to meet their obligations. There can be no guarantee that the federal government will continue to provide assistance to Fannie Mae and Freddie Mac or that it will not change the terms of its obligations.

Short-Term Investments

The Fund may acquire certificates of deposit, bankers’ acceptances and time deposits in U.S. Dollars. Certificates of deposit are negotiable certificates issued against monies deposited in a commercial bank for a definite period of time and earning a specified return. Bankers’ acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are “accepted” by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. These short-term instruments which the Fund may acquire must, at the time of purchase, have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. Government.

Domestic banks are subject to governmental regulations with respect to the amount and types of loans that may be made and interest rates that may be charged. In addition, the profitability of the banking industry depends largely upon the availability and cost of funds and the interest income generated from lending operations. General economic conditions, government policy (including emergency reasons) and the quality of loan portfolios affect the banking industry.

As a result of federal and state laws and regulations, domestic banks are required to maintain specified levels of reserves, are limited in the amount that they can loan to a single borrower, and are subject to regulations designed to promote financial soundness.

In addition to purchasing certificates of deposit and bankers' acceptances, the Fund may invest in interest-bearing time deposits or other interest-bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

The Fund may invest in certificates of deposit (interest-bearing time deposits) issued by savings banks or savings and loan associations that have capital, surplus and undivided profits in excess of \$100 million, based on latest published reports, or less than \$100 million if the principal amount of such obligations is fully insured by the U.S. Government.

The Fund may invest a portion of its assets in commercial paper and short-term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

The Fund's investment in commercial paper and short-term notes will consist of issues rated at the time of purchase "A-2" or higher by Standard & Poor's Ratings Group ("S&P"), "Prime-1" or "Prime-2" by Moody's Investors Service, Inc. ("Moody's"), or similarly rated by another nationally recognized statistical rating organization or, if unrated, will be determined by the Sub-Advisor to be of comparable quality. These rating symbols are described in Appendix A.

Corporate debt obligations are subject to the risk of an issuer's inability to meet principal and interest payments on the obligations, i.e., credit risk. The Sub-Advisor may actively expose the Fund to credit risk. However, there can be no guarantee that the Sub-Advisor will be successful in making the right selections and thus fully mitigate the impact of credit risk changes on the Fund.

Debt Securities

Debt securities are used by issuers to borrow money. Generally, issuers pay investors periodic interest and repay the amount borrowed either periodically during the life of the security and/or at maturity. Some debt securities, such as zero coupon bonds, do not pay current interest, but are purchased at a discount from their face values and accrue interest at the applicable coupon rate over a specified time period. Some debt securities pay a periodic coupon that is not fixed; instead payments "float" relative to a reference rate, such as LIBOR. This "floating rate" debt may pay interest at levels above or below the previous interest payment. The market prices of debt securities fluctuate depending on such factors as interest rates, credit quality and maturity. In general, market prices of debt securities decline when interest rates rise and increase when interest rates fall. Certain additional risk factors related to debt securities are sensitivity to interest rate and economic changes, payment expectations, and liquidity and valuation.

Lower rated debt securities, those rated Ba or below by Moody's Investors Service, Inc. ("Moody's") and/or BB or below by Standard & Poor's Ratings Group ("S&P") or unrated but determined by the Advisor to be of comparable quality, are described by the rating agencies as speculative and involve greater risk of default or price changes than higher rated debt securities due to changes in the issuer's creditworthiness or the fact that the issuer may already be in default. The market prices of these securities may fluctuate more than higher quality securities and may decline significantly in periods of general economic difficulty. It may be more difficult to sell or to determine the value of lower rated debt securities.

Certain additional risk factors related to debt securities are discussed below:

Sensitivity to interest rate and economic changes. Debt securities may be sensitive to economic changes, political and corporate developments, and interest rate changes. In addition, during an economic downturn or periods of rising interest rates, issuers that are highly leveraged may experience increased financial stress that could adversely affect their ability to meet projected business goals, obtain additional financing, and service their principal and interest payment obligations. Furthermore, periods of economic change and uncertainty can be expected to result in increased volatility of market prices and yields of

certain debt securities. For example, prices of these securities can be affected by financial contracts held by the issuer or third parties (such as derivatives) related to the security or other assets or indices.

Payment expectations. Debt securities may contain redemption or call provisions. If an issuer exercises these provisions in a lower interest rate environment, the Fund would have to replace the security with a lower yielding security, resulting in decreased income to investors. If the issuer of a debt security defaults on its obligations to pay interest or principal or is the subject of bankruptcy proceedings, the Fund may incur losses or expenses in seeking recovery of amounts owed to it.

Liquidity. There may be limited trading in the secondary market for particular debt securities, which may adversely affect the Fund's ability to accurately value or sell such debt securities. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the value and/or liquidity of debt securities. The Sub-Advisor attempts to reduce the risks described above through diversification of the Fund's portfolio, credit analysis of each issuer, and by monitoring broad economic trends as well as corporate and legislative developments, but there can be no assurance that it will be successful in doing so. Credit ratings of debt securities provided by rating agencies indicate a measure of the safety of principal and interest payments, not market value risk. The rating of an issuer is a rating agency's view of past and future potential developments related to the issuer and may not necessarily reflect actual outcomes. There can be a lag between corporate developments and the time a rating is assigned and updated.

Changing Fixed Income Market Conditions. Following the financial crisis that began in 2007, the Board of Governors of the Federal Reserve System (the "Federal Reserve") has attempted to stabilize the U.S. economy and support the U.S. economic recovery by keeping the federal funds rate at or near zero percent. In addition, the Federal Reserve has purchased large quantities of securities issued or guaranteed by the U.S. government, its agencies or instrumentalities on the open market ("Quantitative Easing"). As the Federal Reserve "tapers" or reduces Quantitative Easing, and when the Federal Reserve raises the federal funds rate, there is a risk that interest rates across the U.S. financial system will rise. These policy changes may expose fixed-income and related markets to heightened volatility and may reduce liquidity for certain Fund investments, which could cause the value of the Fund's investments and share price to decline. To the extent the Fund experiences high redemptions because of these policy changes, the Fund may experience increased portfolio turnover, which will increase the costs that the Fund incurs and may lower the Fund's performance. The liquidity levels of the Fund's portfolio may also be affected.

Bond markets have consistently grown over the past three decades while the capacity for traditional dealer counterparties to engage in fixed income trading has not kept pace and in some cases has decreased. As a result, dealer inventories of corporate bonds, which provide a core indication of the ability of financial intermediaries to "make markets," are at or near historic lows in relation to market size. Because market makers provide stability to a market through their intermediary services, the significant reduction in dealer inventories could potentially lead to decreased liquidity and increased volatility in the fixed income markets. Such issues may be exacerbated during periods of economic uncertainty.

Bond Ratings. Bond rating agencies may assign modifiers (such as +/-) to ratings categories to signify the relative position of a credit within the rating category. Investment policies that are based on ratings categories should be read to include any security within that category, without considering the modifier. Please refer to Appendix A for more information about credit ratings.

OTHER INVESTMENTS

Short Sales

A short sale is a transaction in which the Fund sells a security it does not own in anticipation that the market price of that security will decline. If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, the Fund will incur a loss; conversely, if the price

declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss will be increased, by the transaction costs incurred by the Fund, including the costs associated with providing collateral to the broker-dealer (usually cash and liquid securities) and the maintenance of collateral with its custodian. Although the Fund's gain is limited to the price at which it sold the security short, its potential loss is theoretically unlimited.

The broker-dealer will retain the net proceeds of the short sale to the extent necessary to meet margin requirements until the short position is closed out.

When the Sub-Advisor believes that the price of a particular security held by the Fund may decline, it may make "short sales against the box" to hedge the unrealized gain on such security. Selling short against the box involves selling a security which the Fund owns for delivery at a specified date in the future. The Fund will incur transaction costs to open, maintain and close short sales against the box.

To the extent the Fund sells securities short (except in the case of short sales "against the box"), it is required to segregate an amount of cash or liquid securities on its records equal to the market price of the securities sold short. The segregated assets are marked to market daily in an attempt to ensure that the amount deposited in the segregated account is at least equal to the market value of the securities sold short. Segregated securities cannot be sold while the position they are covering is outstanding, unless they are replaced with similar securities. As a result, there is the possibility that segregation of a large percentage of the Fund's assets could affect its portfolio management.

Investment Company Securities

The Fund may invest in shares of other investment companies (each, an "Underlying Fund"), including open-end funds, closed-end funds, unit investment trusts ("UITs") and exchange-traded funds ("ETFs"), to the extent permitted by applicable law and subject to certain restrictions set forth in this SAI.

Under Sections 12(d)(1)(A) and 12(d)(1)(B) of the 1940 Act, the Fund and any companies controlled by the Fund may hold securities of an Underlying Fund in amounts which (i) do not exceed 3% of the total outstanding voting stock of such Underlying Fund, (ii) do not exceed 5% of the value of the Fund's total assets and (iii) when added to all other Underlying Fund securities held by the Fund, do not exceed 10% of the value of the Fund's total assets. The Fund may exceed these limits when permitted by SEC order or other applicable law or regulatory guidance, such as is the case with many ETFs.

Generally, under Sections 12(d)(1)(F) and 12(d)(1)(G) of the 1940 Act and SEC rules adopted pursuant to the 1940 Act, the Fund may acquire the securities of affiliated and unaffiliated Underlying Funds subject to the following guidelines and restrictions:

- The Fund may own an unlimited amount of the securities of any registered open-end fund or registered unit investment trust that is affiliated with the Fund, so long as any such Underlying Fund has a policy that prohibits it from acquiring any securities of registered open-end funds or registered unit investment trusts in reliance on certain sections of the 1940 Act.
- The Fund and its "affiliated persons" may own up to 3% of the outstanding stock of any fund, subject to the following restrictions:
 - i. the Fund and each Underlying Fund, in the aggregate, may not charge a sales load greater than the limits set forth in Rule 2830(d)(3) of the Conduct Rules of the Financial Industry Regulatory Authority ("FINRA") applicable to funds of funds;
 - ii. each Underlying Fund is not obligated to redeem more than 1% of its total outstanding securities during any period less than 30 days; and
 - iii. the Fund is obligated either to (i) seek instructions from its shareholders with regard to the voting of all proxies with respect to the Underlying Fund and to vote in accordance with such instructions, or

(ii) to vote the shares of the Underlying Fund held by the Fund in the same proportion as the vote of all other shareholders of the Underlying Fund.

Acquired funds typically incur fees that are separate from those fees incurred directly by the Fund. The Fund's purchase of such investment company securities results in the layering of expenses as Fund shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying Fund expenses. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to certain leverage risks. The net asset value and market value of leveraged securities will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged securities. Investment companies may have investment policies that differ from those of the Fund.

Under certain circumstances an open-end investment company in which the Fund invests may determine to make payment of a redemption by the Fund wholly or in part by a distribution in kind of securities from its portfolio, instead of in cash. As a result, the Fund may hold such securities until the Advisor determines it is appropriate to dispose of them. Such disposition will impose additional costs on the Fund.

Investment decisions by the investment advisors to the registered investment companies in which the Fund invests are made independently of the Fund. At any particular time, one Underlying Fund may be purchasing shares of an issuer whose shares are being sold by another Underlying Fund. As a result, under these circumstances the Fund indirectly would incur certain transactional costs without accomplishing any investment purpose.

Exchange Traded Funds ("ETFs")

The Fund may invest in ETFs, which are investment companies the primary objectives of which generally are to achieve the same rate of return, or the inverse rate of return, as particular market indices while trading throughout the day on an exchange. Certain risks of investing in an ETF are similar to those of investing in an indexed mutual fund, including tracking error risk (the risk of errors in matching the ETF's underlying assets to the index), and the risk that because an ETF is not actively managed, it cannot sell poorly performing stocks as long as they are represented in the index. Other ETF risks include the risk that ETFs may trade in the secondary market at discounts from their net asset values per share ("NAVs") and the risk that the ETFs may not be liquid. Furthermore, there may be times when the exchange on which an ETF is listed halts trading, in which case the Fund would be unable to sell its shares of the ETF until trading is resumed. In addition, because ETFs often invest in portfolios of common stocks and "track" designated indexes, an overall decline in stocks comprising an ETF's benchmark index could have a greater impact on the ETF and investors than might be the case in an investment company with a more widely diversified portfolio. Losses could also occur if the ETF is unable to replicate the performance of the chosen benchmark index. Other risks associated with ETFs include the possibility that: (i) an ETF's distributions may decline if the issuers of the ETF's portfolio securities fail to continue to pay dividends; and (ii) under certain circumstances, an ETF could be terminated. Should termination occur, the ETF could have to liquidate its portfolio when the prices for those assets are falling. In addition, inadequate or irregularly provided information about an ETF or its investments could expose investors in ETFs to unknown risks.

Exchange Traded Notes ("ETNs")

An investment in an ETN involves risks, including possible loss of principal. An ETN is an unsecured debt security issued by a bank that is linked to the total return of a market index. Risks of investing in ETNs also include limited portfolio diversification, uncertain principal payment, and illiquidity. Additionally, the investor fee will reduce the amount of return on maturity or at redemption, and as a result the investor may receive less than the principal amount at maturity or upon redemption, even if the value of the relevant index has increased. An investment in an ETN may not be suitable for all investors.

Derivatives

The Fund may, but is not required to, utilize certain derivatives contracts during temporary defensive periods to hedge the portfolio and mitigate risk. Hedging involves special risks including the possible default by the other party to the transaction, illiquidity and, to the extent the Sub-Advisor's assessment of certain market movements is incorrect, the risk that the use of hedging could result in losses greater than if hedging had not been used. Nonetheless, with respect to certain investment positions, the Fund may not be sufficiently hedged against market fluctuations, in which case an investment position could result in a loss greater than if the Sub-Advisor had been sufficiently hedged with respect to such position. If the Sub-Advisor's prediction of movements in the direction of the securities and interest rate markets is inaccurate, the consequences to the Fund may leave the Fund in a worse position than if it had not used such strategies.

Recent legislation calls for new regulation of the derivatives markets. The extent and impact of the regulation is not yet fully known and may not be for some time. Any new regulations could adversely affect the value, availability and performance of derivative instruments, may make them more costly, and may limit or restrict their use by the Fund.

Certain additional risk factors related to derivatives are discussed below:

Derivatives Risk. Under recently adopted rules by the CFTC, transactions in some types of interest rate swaps and credit default index swaps on North American and European indices will be required to be cleared. In a cleared derivatives transaction, the Fund's counterparty is a clearing house (such as CME Clearing, ICE Clearing or LCH.Clearnet), rather than a bank or broker. Since the Fund is not a member of clearing houses and only members of a clearing house can participate directly in the clearing house, the Fund will hold cleared derivatives through accounts at clearing members, who are futures commission merchants that are members of the clearing houses and who have the appropriate regulatory approvals to engage in swap transactions. The Fund will make and receive payments owed under cleared derivatives transactions (including margin payments) through its accounts at clearing members. Clearing members guarantee performance of their clients' obligations to the clearing house. In contrast to bilateral derivatives transactions, following a period of advance notice to the Fund, clearing members generally can require termination of existing cleared derivatives transactions at any time and increases in margin above the margin that it required at the beginning of a transaction. Clearing houses also have broad rights to increase margin requirements for existing transactions and to terminate transactions. Any such increase or termination could interfere with the ability of the Fund to pursue its investment strategy. Also, the Fund is subject to execution risk if it enters into a derivatives transaction that is required to be cleared (or that the Advisor expects to be cleared), and no clearing member is willing or able to clear the transaction on the Fund's behalf. While the documentation in place between the Fund and its clearing members generally provides that the clearing members will accept for clearing all transactions submitted for clearing that are within credit limits specified by the clearing members in advance, the Fund could be subject to this execution risk if the Fund submits for clearing transactions that exceed such credit limits, if the clearing house does not accept the transactions for clearing, or if the clearing members do not comply with their agreement to clear such transactions. In that case, the transaction might have to be terminated, and the Fund could lose some or all of the benefit of any increase in the value of the transaction after the time of the transaction. In addition, new regulations could, among other things, restrict the Fund's ability to engage in, or increase the cost to the Fund of, derivatives transactions, for example, by making some types of derivatives no longer available to the Fund or increasing margin or capital requirements. If the Fund is not able to enter into a particular derivatives transaction, the Fund's investment performance and risk profile could be adversely affected as a result.

Counterparty Risk. Counterparty risk with respect to over the counter ("OTC") derivatives may be affected by new regulations promulgated by the CFTC and SEC affecting the derivatives market. As described under "Derivatives Risk" above, some derivatives transactions will be required to be cleared, and a party to a cleared derivatives transaction is subject to the credit risk of the clearing house and the clearing member through which it holds its cleared position, rather than the credit risk of its original counterparty to the derivative transaction. Clearing members are required to segregate all funds received from customers with respect to cleared derivatives transactions from the clearing member's proprietary assets. However, all funds and other property received by a clearing broker from its customers are generally held by the clearing broker on a commingled basis

in an omnibus account, which may also invest those funds in certain instruments permitted under the applicable regulations. The assets of the Fund might not be fully protected in the event of the bankruptcy of the Fund's clearing member because the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of the clearing broker's customers for a relevant account class. Also, the clearing member transfers to the clearing house the amount of margin required by the clearing house for cleared derivatives transactions, which amounts are generally held in an omnibus account at the clearing house for all customers of the clearing member. For commodities futures positions, the clearing house may use all of the collateral held in the clearing member's omnibus account to meet a loss in that account, without regard to which customer in fact supplied that collateral. Accordingly, in addition to bearing the credit risk of its clearing member, each customer to a futures transaction also bears "fellow customer" risk from other customers of the clearing member. However, with respect to cleared swaps positions, recent regulations promulgated by the CFTC require that the clearing member notify the clearing house of the amount of initial margin provided by the clearing member to the clearing house that is attributable to each customer. Because margin in respect of cleared swaps must be earmarked for specific clearing member customers, the clearing house may not use the collateral of one customer to cover the obligations of another customer. However, if the clearing member does not provide accurate reporting, the Fund is subject to the risk that a clearing house will use the Fund's assets held in an omnibus account at the clearing house to satisfy payment obligations of a defaulting customer of the clearing member to the clearing house. In addition, clearing members may generally choose to provide to the clearing house the net amount of variation margin required for cleared swaps for all of the clearing member's customers in the aggregate, rather than the gross amount of each customer. The Fund is therefore subject to the risk that a clearing house will not make variation margin payments owed to the Fund if another customer of the clearing member has suffered a loss and is in default.

The derivative contracts that the Fund may use include:

Swap Transactions. The Fund may enter into total return swap contracts for investment purposes. Total return swaps are contracts in which one party agrees to make periodic payments based on the change in market value of the underlying assets, which may include a specified security, basket of securities or security indexes during the specified period, in return for periodic payments based on a fixed or variable interest rate of the total return from other underlying assets. Total return swaps may be used to obtain exposure to a security or market without owning or taking physical custody of such security or market, including in cases in which there may be disadvantages associated with direct ownership of a particular security. In a typical total return equity swap, payments made by the Fund or the counterparty are based on the total return of a particular reference asset or assets (such as an equity security, a combination of such securities, or an index). That is, one party agrees to pay another party the return on a stock, basket of stocks, or stock index in return for a specified interest rate. By entering into an equity index swap, for example, the index receiver can gain exposure to stocks making up the index of securities without actually purchasing those stocks. Total return swaps involve not only the risk associated with the investment in the underlying securities, but also the risk of the counterparty not fulfilling its obligations under the agreement.

The Fund may enter into interest rate, currency and index swaps and the purchase or sale of related caps, floors and collars. The Fund may enter into these transactions to preserve a return or spread on a particular investment or portion of its portfolio, to protect against currency fluctuations or to protect against any increase in the price of securities it anticipates purchasing at a later date. Swaps may be used in conjunction with other instruments to offset interest rate, currency or other underlying risks. For example, interest rate swaps may be offset with "caps," "floors" or "collars". A "cap" is essentially a call option which places a limit on the amount of floating rate interest that must be paid on a certain principal amount. A "floor" is essentially a put option which places a limit on the minimum amount that would be paid on a certain principal amount. A "collar" is essentially a combination of a long cap and a short floor where the limits are set at different levels.

The Fund will usually enter into swaps on a net basis; that is, the two payment streams will be netted out in a cash settlement on the payment date or dates specified in the instrument, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. To the extent obligations created thereby may be deemed to constitute senior securities, the Fund will maintain required collateral in a segregated account consisting of U.S. government securities or cash or cash equivalents. If the Fund were assigned an exercise notice

on a call it has written, it would be required to liquidate portfolio securities in order to satisfy the exercise, unless it has other liquid assets that are sufficient to satisfy the exercise of the call. If the Fund has written a call, there is also a risk that the market may decline between the time the Fund has a call exercised against it, at a price which is fixed as of the closing level of the index on the date of exercise, and the time it is able to sell securities in its portfolio. As with stock options, the Fund will not learn that an index option has been exercised until the day following the exercise date but, unlike a call on stock where it would be able to deliver the underlying securities in settlement, the Fund may have to sell part of its securities portfolio in order to make settlement in cash, and the price of such securities might decline before they can be sold. For example, even if an index call which the Fund has written is "covered" by an index call held by the Fund with the same strike price, it will bear the risk that the level of the index may decline between the close of trading on the date the exercise notice is filed with the Options Clearing Corporation and the close of trading on the date the Fund exercises the call it holds or the time it sells the call, which in either case would occur no earlier than the day following the day the exercise notice was filed.

Options Transactions. The Fund may invest in put and call options transactions involving options on securities and on stock indices that are traded on U.S. and foreign exchanges or in the over-the-counter markets. Securities and options exchanges have established limitations on the maximum number of options that an investor or group of investors acting in concert may write. It is possible that the Fund, other investment vehicles advised by the Sub-Advisor and other clients of the Sub-Advisor may be considered such a group. Position limits may restrict the Fund's ability to purchase or sell options on particular securities and on stock indices. Index prices may be distorted if trading in certain stocks included in the index is interrupted. Trading in the index options may also be interrupted in certain circumstances, such as if trading were halted in a substantial number of stocks included in the index. If this occurred, the Fund would not be able to close out options which it had purchased or written and, if restrictions on exercise were imposed, might be unable to exercise an option it held, which could result in substantial losses to the Fund.

The Fund may write "covered" calls and "covered" puts on equity or debt securities and on stock indices in seeking to enhance investment return or to hedge against declines in the prices of portfolio securities. In addition, the Fund may write put options to hedge against increases in the prices of securities which it intends to purchase. A call option is covered if the Fund holds, on a share-for-share basis, either the underlying shares or a call on the same security as the call written where the exercise price of the call held is equal to or less than the exercise price of the call written (or greater than the exercise price of the call written if the difference is maintained by the Fund in cash, treasury bills or other high grade short-term obligations in a segregated account with its custodian). A put option is "covered" if the Fund maintains cash, treasury bills or other high grade short-term obligations with a value equal to the exercise price in a segregated account with its custodian, or holds on a share-for-share basis a put on the same equity or debt security as the put written where the exercise price of the put held is equal to or greater than the exercise price of the put written, or lower than the exercise price of the put written if the difference is maintained in a segregated account with its custodian.

Options on Stock Indices. The Fund may write call options on broadly based stock market indices only if at the time of writing it holds a portfolio of stocks. When the Fund writes a call option on a broadly based stock market index, it will segregate or put into escrow with its custodian any combination of cash, cash equivalents or "qualified securities" with a market value at the time the option is written of not less than 100% of the current index value times the multiplier times the number of contracts. A "qualified security" is an equity security which is listed on a securities exchange or on the NASDAQ against which the Fund has not written a call option and which has not been hedged by the sale of stock index futures.

Futures and Options on Futures. The Fund may use interest rate, foreign currency, index and other futures contracts. The Fund may also use options on futures contracts. A futures contract provides for the future sale by one party and purchase by another party of a specified quantity of the security or other financial instrument at a specified price and time. A futures contract on an index is an agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to the difference between the value of the index at the close of the last trading day of the contract and the price at which the index contract originally was written. Although the value of an index might be a function of the value of certain specified securities, physical delivery of these securities is not always made. A public market exists in futures contracts covering a number of indexes, as well as financial instruments, including, without limitation: U.S. Treasury bonds; U.S. Treasury notes; GNMA

Certificates; three-month U.S. Treasury bills; 90-day commercial paper; bank certificates of deposit; Eurodollar certificates of deposit; the Australian dollar; the Canadian dollar; the British pound; the Japanese yen; the Swiss franc; the Mexican peso; and certain multinational currencies, such as the euro. It is expected that other futures contracts will be developed and traded in the future.

The Fund may purchase and write call and put futures options. Futures options possess many of the same characteristics as options on securities and indexes (discussed above). A futures option gives the holder the right, in return for the premium paid, to assume a long position (call) or short position (put) in a futures contract at a specified exercise price upon expiration of, or at any time during the period of, the option. Upon exercise of a call option, the holder acquires a long position in the futures contract and the writer is assigned the opposite short position. In the case of a put option, the opposite is true. When a purchase or sale of a futures contract is made by the Fund, the Fund is required to deposit with its futures commission merchant a specified amount of liquid assets ("initial margin"). The margin required for a futures contract is set by the exchange on which the contract is traded and may be modified during the term of the contract. The initial margin is in the nature of a performance bond or good faith deposit on the futures contract that is returned to the Fund upon termination of the contract, assuming all contractual obligations have been satisfied. The Fund expects to earn taxable interest income on its initial margin deposits. The Fund, as a writer of an option, may have no control over whether the underlying futures contracts may be sold (call) or purchased (put) and as a result, bears the market risk of an unfavorable change in the valuation of the futures contracts underlying the written option. The Fund, as a purchaser of an option, bears the risk that the counterparties to the option may not have the ability to meet the terms of the option contract.

Futures and options on futures are regulated by the Commodity Futures Trading Commission ("CFTC"). The Fund invests in futures, options on futures and other instruments subject to regulation by the CFTC in reliance upon and in accordance with CFTC Regulation 4.5. Under Regulation 4.5, if the Fund uses futures, options on futures, or swaps other than for bona fide hedging purposes (as defined by the CFTC), the aggregate initial margin and premiums on these positions (after taking into account unrealized profits and unrealized losses on any such positions and excluding the amount by which options that are "in-the-money" at the time of purchase of a new position are "in-the-money") may not exceed 5% of the Fund's net asset value, or alternatively, the aggregate net notional value of those positions at the time may not exceed 100% of the Fund's net asset value (after taking into account unrealized profits and unrealized losses on any such positions). The Trust, on behalf of the Fund, has filed a notice of eligibility for exclusion from the definition of the term "commodity pool operator" in accordance with Regulation 4.5. Therefore, as of the date of this SAI, neither the Trust nor the Fund is deemed to be a "commodity pool" or "commodity pool operator" under the Commodity Exchange Act ("CEA"), and they are not subject to registration or regulation as such under the CEA. In addition, as of the date of this SAI, the Advisor is not deemed to be a "commodity pool operator" or "commodity trading adviser" with respect to the advisory services it provides to the Fund. In the future, if the Fund's use of futures, options on futures, or swaps requires the Advisor to register as a commodity pool operator with the CFTC, the Advisor will do so at that time.

A futures contract held by the Fund is valued daily at the official settlement price of the exchange on which it is traded. Each day the Fund pays or receives cash, called "variation margin," equal to the daily change in value of the futures contract. This process is known as "marking to market." Variation margin does not represent a borrowing or loan by the Fund but is instead a settlement between the Fund and the broker of the amount one would owe the other if the futures contract expired. In computing daily net asset value, the Fund will mark to market its open futures positions. The Fund also is required to deposit and to maintain margin with respect to put and call options on futures contracts written by it. Such margin deposits will vary depending on the nature of the underlying futures contract (and the related initial margin requirements), the current market value of the option and other futures positions held by the Fund. Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out prior to delivery by offsetting purchases or sales of matching futures contracts (involving the same exchange, underlying security or index and delivery month). If an offsetting purchase price is less than the original sale price, the Fund realizes a capital gain, or if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the Fund realizes a capital gain, or if it is less, the Fund realizes a capital loss. The transaction costs also must be included in these calculations.

The Fund may write covered straddles consisting of a call and a put written on the same underlying futures contract. A straddle will be covered when sufficient assets are deposited to meet the Fund's immediate obligations. The Fund may use the same liquid assets to cover both the call and put options if the exercise price of the call and put are the same, or if the exercise price of the call is higher than that of the put. In such cases, the Fund also will segregate liquid assets equivalent to the amount, if any, by which the put is "in the money."

With respect to options and futures contracts that are cash settled, the Fund is permitted to set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligations under the contracts (less any amounts the Fund has posted as margin), if any, rather than the full notional value. In the case of options and futures contracts that are not cash settled, the Fund will set aside liquid assets equal to the full notional value of the contracts (less any amounts the Fund has posted as margin), while the positions are open.

Stock Index Futures. The Fund may invest in stock index futures only as a substitute for a comparable market position in the underlying securities. A stock index future obligates the seller to deliver (and the purchaser to accept), effectively, an amount of cash equal to a specific dollar amount times the difference between the value of a specific stock index at the close of the last trading day of the contract and the price at which the agreement is made. No physical delivery of the underlying stocks in the index is made. With respect to stock indices that are permitted investments, the Fund intends to purchase and sell futures contracts on the stock index for which it can obtain the best price with consideration also given to liquidity.

Over the Counter Derivatives Transactions. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), which was signed into law on July 21, 2010, established a new statutory framework that comprehensively regulated the OTC derivatives markets for the first time. Key Dodd-Frank Act provisions relating to OTC derivatives require rulemaking by the SEC and the CFTC, not all of which has been proposed or finalized as at the date of this SAI. Prior to the Dodd-Frank Act, the OTC derivatives markets were traditionally traded on a bilateral basis (so-called "bilateral OTC transactions"). Now certain OTC derivatives contracts are required to be centrally cleared and traded on exchanges or electronic trading platforms called swap execution facilities ("SEFs").

Bilateral OTC transactions differ from exchange-traded or cleared derivatives transactions in several respects. Bilateral OTC transactions are transacted directly with dealers and not with a clearing corporation. Without the availability of a clearing corporation, bilateral OTC transaction pricing is normally done by reference to information from market makers, which information is carefully monitored by the Sub-Advisor and verified in appropriate cases. As bilateral OTC transactions are entered into directly with a dealer, there is a risk of nonperformance by the dealer as a result of its insolvency or otherwise. Under recently-adopted CFTC regulations, counterparties of registered swap dealers and major swap participants have the right to elect segregation of initial margin in respect of uncleared swaps. If a counterparty makes such an election, any initial margin that is posted to the swap dealer or major swap participant must be segregated in individual customer accounts held at an independent third-party custodian. In addition, the collateral may only be invested in certain categories of instruments identified in the CFTC's regulations. Agreements covering these segregation arrangements must generally provide for consent by both the counterparty and the swap dealer or major swap participant to withdraw margin from the segregated account. Given these limitations on the use of uncleared swaps collateral, there is some likelihood that the electing counterparty will experience an increase in the costs associated with trading swaps with the relevant swap dealer or major swap participant. Certain other protections apply to a counterparty to uncleared swaps under the CFTC's regulations even if the counterparty does not elect segregation of its initial margin. These regulations are newly adopted, and it remains unclear whether they will be effective in protecting initial margin in the manner intended in the event of significant market stress or the insolvency of a swap dealer or major swap participant.

Furthermore, a bilateral OTC transaction may only be terminated voluntarily by entering into a closing transaction with the dealer with which the Fund originally dealt. Any such cancellation may require the Fund to pay a premium to that dealer. In those cases in which the Fund has entered into a covered transaction and cannot voluntarily terminate the transaction, the Fund will not be able to sell the underlying security until the transaction expires or is exercised or different cover is substituted. The Fund will seek to enter into OTC transactions only with dealers which agree to, and which are expected to be capable of, entering into closing transactions with the

Fund. There is also no assurance that the Fund will be able to liquidate an OTC transaction at any time prior to expiration.

The requirement to execute certain OTC derivatives contracts on SEFs may offer certain advantages over traditional bilateral OTC trading, such as ease of execution, price transparency, increased liquidity and/or favorable pricing. However, SEF trading may make it more difficult and costly for the Fund to enter into highly tailored or customized transactions and may result in additional costs and risks. Market participants such as the Fund that execute derivatives contracts through a SEF, whether directly or through a broker intermediary, are required to submit to the jurisdiction of the SEF and comply with SEF and CFTC rules and regulations which impose, among other things disclosure and recordkeeping obligations. In addition, the Fund will generally incur SEF or broker intermediary fees when it trades on a SEF. The Fund may also be required to indemnify the SEF or broker intermediary for any losses or costs that may result from the Fund's transactions on the SEF.

Temporary Investments - Defensive Positions

If market conditions, tactical portfolio trading considerations or other financial or business conditions occur which in the judgment of the Sub-Advisor could result in the long term impairment of the Fund's assets with respect to all or a portion of the Fund's portfolio, the Sub-Advisor may, but is not required to, implement strategies to place the portfolio or individual securities in the portfolio in defensive posture for a period of time (a "temporary defensive period") until, in the Sub-Advisor's assessment, such condition or circumstance has abated. In the case of a perceived impairment with respect to all or a portion of the Fund's portfolio, the Fund may, but is not required to, use various strategic transactions in order to hedge the portfolio or individual securities in the portfolio and mitigate risks with respect to individual MLPs, sub-classes of MLP investments or as to the portfolio taken as a whole. These strategies are limited to a maximum of 30% of the Fund's net asset value and may be executed through the use of derivative contracts including the purchase and sale of exchange-listed and over-the-counter put and call options on securities and equity and fixed-income indices, and other instruments including exchange-traded funds and exchange-traded notes. The Fund may also engage in short sales and total return swaps with certain counterparties that offer returns based upon the underlying performance of a single security or a basket of securities. The Fund may also enter into other derivative transactions including new techniques, instruments or strategies that are permitted as regulatory changes occur.

Borrowing

The Fund does not intend to borrow funds for investment purposes. The Fund may, from time to time, borrow funds over the short term for working capital needs to provide liquidity for distributions or redemption requests in a timely manner so as to avoid short term trading activity that may be harmful to Fund shareholders. Under the 1940 Act, the Fund may borrow for temporary purposes and/or for investment purposes subject to certain restrictions. Such a practice would result in leveraging of the Fund's assets and could cause the Fund to liquidate portfolio positions when it would not be advantageous to do so. Such borrowing may be secured or unsecured. Provisions of the 1940 Act require the Fund to maintain continuous asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed, with an exception for borrowings not in excess of 5% of the Fund's total assets made for temporary administrative purposes. Any borrowings for temporary administrative purposes in excess of 5% of the Fund's total assets will count against this asset coverage requirement. If the 300% asset coverage should decline as a result of market fluctuations or other reasons, the Fund may be required to sell some of its portfolio holdings within three days to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint if the Fund sells securities at that time. Borrowing will tend to exaggerate the effect on net asset value of any increase or decrease in the market value of the Fund's portfolio. Money borrowed will be subject to interest charges which may or may not be recovered by appreciation of the securities purchased, if any. The Fund also may be required to maintain minimum average balances in connection with such borrowings or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

Illiquid Securities

The Fund may invest up to 15% of its net assets in illiquid securities, including (i) securities for which there is no readily available market; (ii) securities in which the disposition would be subject to legal restrictions (so called “restricted securities”); and (iii) repurchase agreements having more than seven days to maturity. However, the Fund will not acquire illiquid securities if, as a result, such securities would comprise more than 15% of the value of the Fund’s net assets. The Trust’s Board of Trustees (the “Board”) or its delegate has the ultimate authority to determine, to the extent permissible under the federal securities laws, which securities are liquid or illiquid for purposes of this 15% limitation. The Board has delegated to the Advisor the day-to-day determination of the illiquidity of any security held by the Fund, although it has retained oversight and ultimate responsibility for such determinations. Although no definitive liquidity criteria are used, the Board has directed the Advisor to consider to such factors as (a) frequency of trading and availability of quotations; (b) the number of dealers willing to purchase or sell the security and the availability of buyers; (c) the willingness of dealers to be market makers in the security; and (d) the nature of trading activity including (i) the time needed to dispose of a position or part of a position and (ii) offer and solicitation methods. A considerable period of time may elapse between the Fund’s decision to sell such securities and the time when the Fund is able to sell them, during which time the value of the securities could decline. Illiquid securities will usually be priced at fair value as determined in good faith by the Board or its delegate. If, through the appreciation of illiquid securities or the depreciation of liquid securities, more than 15% of the value of the Fund’s net assets is invested in illiquid securities, including restricted securities which are not readily marketable, the Fund will take such steps as are deemed advisable, if any, to protect liquidity.

Cyber Security Risk

Investment companies, such as the Fund, and its service providers may be subject to operational and information security risks resulting from cyber attacks. Cyber attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber attacks affecting the Fund, the Advisor or the Sub-Advisor, the Fund’s custodian or transfer agent, or intermediaries or other third-party service providers may adversely impact the Fund. For instance, cyber attacks may interfere with the processing of shareholder transactions, impact the Fund’s ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject the Fund to regulatory fines or financial losses, and cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. While the Fund and its service providers have established business continuity plans and risk management systems designed to prevent or reduce the impact of cybersecurity attacks, such plans and systems have inherent limitations due in part to the ever-changing nature of technology and cybersecurity attack tactics, and there is a possibility that certain risks have not been adequately identified or prepared for. Furthermore, the Fund cannot control any cybersecurity plans or systems implemented by its service providers.

Similar types of cyber security risks are also present for issuers of securities in which the Fund invests, which could result in material adverse consequences for such issuers, and may cause the Fund’s investment in such portfolio companies to lose value.

Market Conditions

The equity and debt capital markets in the United States and internationally experienced unprecedented volatility from 2008 through 2012. These conditions caused a significant decline in the value and liquidity of many securities and other instruments. It is impossible to predict whether such conditions will recur. Because such situations may be widespread, it may be difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of such events.

INVESTMENT RESTRICTIONS

Fundamental Policies

The Fund has adopted the following restrictions as fundamental policies, which may not be changed without the favorable vote of the holders of a “majority,” of the outstanding voting securities of the Fund, as defined in the 1940 Act. Under the 1940 Act, the “vote of the holders of a majority of the outstanding voting securities” of the Fund means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund. The Fund’s investment objective is a non-fundamental policy and may be changed without shareholder approval.

The Fund may not:

- issue senior securities or borrow money, except to the extent permitted by the 1940 Act or any rules, exemptions or interpretations thereunder that may be adopted, granted or issued by the SEC (for purposes of clarity, this restriction shall not prohibit the Fund from engaging in options transactions or short sales and in investing in financial futures and reverse repurchase agreements);
- act as underwriter, except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities in its investment portfolio;
- invest 25% or more of its total assets, calculated at the time of purchase, in any one industry, except that the Fund will concentrate (that is, invest 25% or more of its total assets) in the energy infrastructure industry and the energy industry (including MLPs that concentrate in those industries), and the Fund may invest 25% or more of its total assets in securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities;
- purchase or sell real estate or interests in real estate or real estate limited partnerships (although the Fund may purchase and sell securities which are secured by real estate and securities of companies which invest or deal in real estate, such as real estate MLPs and real estate investment trusts (REITs));
- make loans of money, except (i) for purchases of debt securities consistent with the investment policies of the Fund, (ii) by engaging in repurchase agreements or, (iii) through the loan of portfolio securities in an amount up to 33 1/3% of the Fund’s net assets; or
- purchase or sell commodities, except that the Fund may purchase and sell futures contracts and options; may enter into foreign exchange contracts; may enter into swap agreements and other financial transactions not requiring the delivery of physical commodities; may purchase or sell precious metals directly, and may purchase or sell precious metal commodity contracts or options on such contracts in compliance with applicable commodities laws.

Non-Fundamental Policies

The Fund observes the following restriction as a matter of operating but not fundamental policy, pursuant to positions taken by federal regulatory authorities:

The Fund may not invest, in the aggregate, more than 15% of its net assets in securities with legal or contractual restrictions on resale, securities that are not readily marketable and repurchase agreements with more than seven days to maturity.

Except with respect to borrowing, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation.

MANAGEMENT OF THE FUND

Trustees and Officers

The overall management of the business and affairs of the Trust is vested with its Board of Trustees. The Board approves all significant agreements between the Trust and persons or companies furnishing services to it, including the agreements with the Advisor, co-administrators, distributor, custodian and transfer agent. The day-to-day operations of the Trust are delegated to its officers, except that the Sub-Advisor is responsible for making day-to-day investment decisions in accordance with the Fund’s investment objective, strategies, and policies, all of which are subject to general supervision by the Advisor and the Board.

The Trustees and officers of the Trust, their years of birth and positions with the Trust, term of office with the Trust and length of time served, their business addresses and principal occupations during the past five years and other directorships held during the past five years are listed in the table below. Unless noted otherwise, each person has held the position listed for a minimum of five years. Charles H. Miller, Ashley Toomey Rabun, William H. Young and John P. Zader are all of the Trustees who are not “interested persons” of the Trust, as that term is defined in the 1940 Act (collectively, the “Independent Trustees”).

Name, Address, Year of Birth and Position(s) held with Trust	Term of Office ^c and Length of Time Served	Principal Occupation During the Past Five Years and Other Affiliations	Number of Portfolios in the Fund Complex Overseen by Trustee	Other Directorships Held by Trustee During the Past Five Years
“Independent” Trustees:				
Charles H. Miller ^a (born 1947) Trustee	Since November 2007	Retired (2013 – present). Executive Vice President, Client Management and Development, Access Data, a Broadridge company, a provider of technology and services to asset management firms (1997-2012).	75	None.
Ashley Toomey Rabun ^a (born 1952) Trustee and Chairperson of the Board	Since November 2007	Retired (2016 – present). President and Founder, InvestorReach, Inc. a financial services consulting firm (1996-2015).	75	Select Sector SPDR Trust, a registered investment company (includes 11 portfolios).
William H. Young ^a (born 1950) Trustee	Since November 2007	Retired (2014 - present). Independent financial services consultant (1996-2014). Interim CEO, Unified Fund Services Inc. (now Huntington Fund Services), a mutual fund service provider (2003 - 2006). Senior Vice President, Oppenheimer Management Company (1983 - 1996). Chairman, NICSAs, an investment management trade association (1993 – 1996).	75	None.

John P. Zader ^a (born 1961) Trustee	Since November 2007	Retired (June 2014 - present). CEO, UMB Fund Services, Inc., a mutual fund and hedge fund service provider, and the transfer agent, fund accountant, and co-administrator for the Fund (December 2006 - June 2014). President, Investment Managers Series Trust (December 2007 - June 2014).	75	Investment Managers Series Trust II, a registered investment company (includes 13 portfolios).
Interested Trustees:				
Eric M. Banhazl ^{b†} (born 1957) Trustee	Since January 2008	Chairman (2016 - present), and President (2006 - 2015), Mutual Fund Administration, LLC, the co- administrator for the Fund. a Address for certain Trustees and certain officers: 235 West Galena Street, Milwaukee, Wisconsin 53212.

b Address for Mr. Banhazl, Ms. Ausili, Ms. Dam and Ms. Drake: 2220 E. Route 66, Suite 226, Glendora, California 91740.

Address for Mr. Dziura: 39 Stafford Square, Boyertown, Pennsylvania 19512.

c Trustees and officers serve until their successors have been duly elected.

† Mr. Banhazl is an “interested person” of the Trust by virtue of his position with Mutual Fund Administration, LLC.

Compensation

Each Independent Trustee receives from the Trust a quarterly retainer of \$30,000. Each Independent Trustee also receives \$4,000 for each special in-person meeting attended and \$1,000 for each telephonic meeting attended. In addition, Ms. Rabun receives an additional annual retainer of \$25,000 for serving as Chairperson of the Board; and each of Mr. Young, Mr. Miller and Mr. Zader receives an additional annual retainer of \$10,000 for serving as Audit Committee Chair, Valuation Committee Chair and Nominating, Governance and Regulatory Review Committee Chair, respectively. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Independent Trustees.

Name of Person/Position	Aggregate Compensation From the Fund ¹	Pension or Retirement Benefits Accrued as Part of Fund’s Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from Trust (82 Funds) Paid to Trustees ¹
Charles H. Miller, Independent Trustee and Valuation Committee Chair	\$3,686	None	None	\$126,000
Ashley Toomey Rabun, Independent Trustee and Chairperson	\$4,070	None	None	\$139,000
William H. Young, Independent Trustee and Audit Committee Chair	\$3,627	None	None	\$124,000
John P. Zader, Independent Trustee and Nominating, Governance and Regulatory Review Committee Chair	\$3,434	None	None	\$118,000

¹ For the fiscal year ended November 30, 2016.

Mr. Banhazl is not compensated for his service as Trustee because of his affiliation with the Trust. Officers of the Trust are not compensated by the Fund for their services.

Additional Information Concerning the Board and the Trustees

The current Trustees were selected in November 2007 (January 2008 for Mr. Banhazl) with a view towards establishing a Board that would have the broad experience needed to oversee a registered investment company comprised of multiple series employing a variety of different investment strategies. As a group, the Board has extensive experience in many different aspects of the financial services and asset management industries.

The Trustees were selected to join the Board based upon the following factors, among others: character and integrity; willingness to serve and willingness and ability to commit the time necessary to perform the duties of a Trustee; as to each Trustee other than Mr. Banhazl and Zader (at that time), satisfying the criteria for not being classified as an “interested person” of the Trust as defined in the 1940 Act; and, as to Mr. Banhazl his current position with Mutual Fund Administration, LLC, one of the Trust’s co-administrators. In addition, the Trustees have the following specific experience, qualifications, attributes and/or skills relevant to the operations of the Trust:

- Ms. Rabun has substantial senior executive experience in mutual fund marketing and distribution and serving in senior executive and board positions with mutual funds, including multiple series trusts similar to the Trust.
- Mr. Miller has significant senior executive experience with respect to marketing and distribution of mutual funds, including multiple series trusts similar to the Trust.
- Mr. Young has broad senior executive experience with respect to the operations and management of mutual funds and administrative service providers, including multiple series trusts similar to the Trust.
- Mr. Banhazl has significant experience serving in senior executive and board positions for mutual funds and with respect to the organization and operation of mutual funds and multiple series trusts similar to the Trust.
- Mr. Zader has substantial experience serving in senior executive positions at mutual fund administrative service providers.

In its periodic self-assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board's overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the various series of the Trust. The summaries set forth above as to the qualifications, attributes and skills of the Trustees are required by the registration form adopted by the SEC, do not constitute holding out the Board or any Trustee as having any special expertise or experience, and do not impose any greater responsibility or liability on any such person or on the Board as a whole than would otherwise be the case.

The Board of Trustees has three standing committees: the Audit Committee, the Nominating, Governance and Regulatory Review Committee (the "Nominating Committee"), and the Valuation Committee.

- The function of the Audit Committee, with respect to each series of the Trust, is to review the scope and results of the series' annual audit and any matters bearing on the audit or the series' financial statements and to assist the Board's oversight of the integrity of the series' pricing and financial reporting. The Audit Committee is comprised of all of the Independent Trustees and is chaired by Mr. Young. It does not include any Interested Trustees. The Audit Committee met twice during the fiscal year ended November 30, 2016 with respect to the Fund.

The Audit Committee also serves as the Qualified Legal Compliance Committee for the Trust for the purpose of compliance with Rules 205.2(k) and 205.3(c) of the Code of Federal Regulations regarding alternative reporting procedures for attorneys retained or employed by an issuer who appear and practice before the SEC on behalf of the issuer.

- The Nominating Committee is responsible for reviewing matters pertaining to composition, committees, and operations of the Board, as well as assisting the Board in overseeing matters related to certain regulatory issues. The Nominating Committee meets from time to time as needed. The Nominating Committee will consider trustee nominees properly recommended by the Trust's shareholders. Shareholders who wish to recommend a nominee should send nominations that include, among other things, biographical data and the qualifications of the proposed nominee to the Trust's Secretary. The Independent Trustees comprise the Nominating Committee, and the Committee is chaired by Mr. Zader. The Nominating Committee met three times during the fiscal year ended November 30, 2016.
- The function of the Valuation Committee is to value securities held by any series of the Trust for which current and reliable market quotations are not readily available. Such securities are valued at their respective fair values as determined in good faith by the Valuation Committee and the actions of the Valuation Committee are subsequently reviewed by the Board. The Valuation Committee meets as

needed. The Valuation Committee is comprised of all the Trustees and is chaired by Mr. Miller, but action may be taken by any one of the Trustees. The Valuation Committee did not meet during the fiscal year ended November 30, 2016 with respect to the Fund.

Independent Trustees comprise 80% of the Board and Ashley Toomey Rabun, an Independent Trustee, serves as Chairperson of the Board. The Chairperson serves as a key point person for dealings between the Trust's management and the other Independent Trustees. As noted above, through the committees of the Board the Independent Trustees consider and address important matters involving each series of the Trust, including those presenting conflicts or potential conflicts of interest. The Independent Trustees also regularly meet outside the presence of management and are advised by independent legal counsel. The Board has determined that its organization and leadership structure are appropriate in light of its fiduciary and oversight obligations, the special obligations of the Independent Trustees, and the relationship between the Interested Trustees and the Trust's co-administrators. The Board also believes that its structure facilitates the orderly and efficient flow of information to the Independent Trustees from management.

Consistent with its responsibility for oversight of the Fund in the interests of shareholders, the Board among other things oversees risk management of the Fund's investment programs and business affairs directly and through the Audit Committee. The Board has emphasized to the Advisor the importance of maintaining vigorous risk management programs and procedures.

The Fund faces a number of risks, such as investment risk, valuation risk, reputational risk, risk of operational failure or lack of business continuity, and legal, compliance and regulatory risk. Risk management seeks to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Fund. Under the overall supervision of the Board, the Advisor, the Sub-Advisor and other service providers to the Fund employ a variety of processes, procedures and controls to identify various of those possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Different processes, procedures and controls are employed with respect to different types of risks. Various personnel, including the Trust's Chief Compliance Officer (the "CCO"), the Advisor's management, and other service providers (such as the Fund's independent registered public accounting firm) make periodic reports to the Board or to the Audit Committee with respect to various aspects of risk management. The Board recognizes that not all risks that may affect the Fund can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Fund's investment objective, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. As a result of the foregoing and other factors, the Board's risk management oversight is subject to substantial limitations.

Fund Shares Beneficially Owned by Trustees

Certain information regarding ownership by the Trustees of the Fund and other series of the Trust as of December 31, 2016 is set forth in the following table.

Name of Trustee	Dollar Range of Equity Securities in the Fund (None, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, Over \$100,000)	Aggregate Dollar Range of Equity Securities in all Registered Investment Companies Overseen by Trustee in Family of Investment Companies
Charles H. Miller, Independent Trustee	None	\$1 - \$10,000
Ashley Toomey Rabun, Independent Trustee	None	None
William H. Young, Independent Trustee	None	None
John P. Zader, Independent Trustee	None	None
Eric M. Banhazl, Interested Trustee	None	Above \$100,000

Control Persons, Principal Shareholders, and Management Ownership

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of any class of the Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of the Fund or acknowledges the existence of control. Shareholders with a controlling interest could affect the outcome of voting or the direction of management of the Fund. To the best knowledge of the Trust, the control persons and principal shareholders of the Fund are set forth in the following table.

Control Persons	Jurisdiction	% of Total Outstanding Shares of the Fund as of March 2, 2017
Morgan Stanley Smith Barney LLC	Jersey City	48.42%

Shareholders	Percentage of Total Outstanding Shares of the Class as of March 2, 2017
Class A	
Morgan Stanley Smith Barney LLC Jersey City, NJ 07311	34.75%
Wells Fargo Clearing LLC Saint Louis, MO 63103	24.44%
UBS WM USA Weehawken, NJ 07086	14.76%
Class C	
Wells Fargo Clearing LLC Saint Louis, MO 63103	37.72%
Morgan Stanley Smith Barney LLC Jersey City, NJ 07311	30.76%
UBS WM USA Weehawken, NJ 07086	15.96%
Charles Schwab & Co Inc. San Francisco, CA 94104	5.10%
Institutional Class	
Morgan Stanley Smith Barney LLC Jersey City, NJ 07311	64.00%
UBS WM USA Weehawken, NJ 07086	14.05%
Wells Fargo Clearing LLC Saint Louis, MO 63103	13.84%

As of March 2, 2017, the Trustees and officers of the Trust as a group did not own more than 1% of the outstanding shares of the Fund. Furthermore, neither the Independent Trustees nor members of their immediate families own securities beneficially or of record in the Advisor, the Sub-Advisor, the Fund's distributor, Foreside Fund Services, LLC (the "Distributor"), or any of their respective affiliates.

Advisor

The Advisor, Liberty Street Advisors, Inc., located at 100 Wall Street, 20th Floor, New York, NY 10005, serves as investment advisor to the Fund pursuant to an investment advisory agreement with the Trust (the "Advisory Agreement"). The Advisor is a corporation organized in New York. The Advisor is privately owned and the controlling interests of the Advisor are held by Raymond A. Hill III, Timothy Reick, Victor J. Fontana and Scott Daniels.

Subject to such policies as the Board of Trustees may determine, the Advisor is ultimately responsible for investment decisions for the Fund. Pursuant to the terms of the Advisory Agreement, the Advisor provides the Fund with investment advice, makes recommendations with respect to the selection and continued employment of the Sub-Advisor to manage the Fund's assets, supervises the investment program of the Fund and the composition of its investment portfolio, reviews investment performance and adherence to compliance procedures, and oversees the investments made by the Sub-Advisor. The Advisor also continuously monitors the Sub-Advisor's compliance with the Fund's investment objective, policies and restrictions. Subject to such policies as the Board of Trustees may determine, the Advisor is ultimately responsible for investment decisions for the Fund.

Sub-Advisor

The Advisor has entered into a sub-advisory agreement with Coast Capital Advisors, LP with respect to the Fund (the "Sub-Advisory Agreement"). Subject to the oversight of the Board and the Advisor, the Sub-Advisor makes decisions regarding the investment and reinvestment of the Fund's assets.

The Sub-Advisor is a limited partnership organized in Delaware. The Sub-Advisor is independent and privately owned with the controlling interest indirectly held by active employees.

The Advisor compensates the Sub-Advisor out of the investment advisory fees the Advisor receives from the Fund. The Sub-Advisor makes investment decisions for the assets it has been allocated to manage, subject to the overall supervision of the Advisor.

Fees

For services rendered by the Advisor under the Advisory Agreement, the Fund pays the Advisor a fee, payable monthly, in an annual amount equal to 1% of the Fund's average daily net assets. The Sub-Advisor's fee, payable monthly, is equal to 50% of the Advisor's fee, net of reductions for fees waived by the Advisor and/or expense reimbursements made by the Advisor to the Fund, if any, and certain other organizational and operational expenses, if any, that may be incurred by the Advisor for services rendered to the Fund.

The Fund has paid the following advisory fees to the Advisor:

	Advisory Fees Accrued	Advisory Fees (Waived)/Recouped	Advisory Fee Retained
For the fiscal year ended November 30, 2016	\$22,914,593	\$0	\$22,914,593
For the fiscal year ended November 30, 2015	\$29,767,484	\$0	\$29,767,484
For the fiscal year ended November 30, 2014	\$27,762,044	\$0	\$27,762,044

The Fund is responsible for its own operating expenses (all of which will be borne directly or indirectly by the Fund's shareholders), including among others, legal fees and expenses of counsel to the Fund and the Fund's independent trustees; insurance (including trustees' and officers' errors and omissions insurance); auditing and accounting expenses; taxes and governmental fees; listing fees; dues and expenses incurred in connection with membership in investment company organizations; fees and expenses of the Fund's custodians, administrators, transfer agents, registrars and other service providers; expenses for portfolio pricing services by a pricing agent, if any; expenses in connection with the issuance and offering of shares; expenses relating to investor and public relations; expenses of registering or qualifying securities of the Funds for public sale; brokerage commissions and other costs of acquiring or disposing of any portfolio holding of the Funds; expenses of preparation and distribution of reports, notices and dividends to shareholders; expenses of the dividend reinvestment plan; compensation and expenses of trustees; any litigation expenses; and costs of shareholders' and other meetings.

The Advisor has contractually agreed to waive its fees and/or pay for operating expenses of the Fund to ensure that total annual operating expenses (excluding taxes, leverage interest, brokerage commissions, dividend expenses on short sales, acquired fund fees and expenses (as determined in accordance with Form N-1A), expenses incurred in connection with any merger or reorganization, or extraordinary expenses such as litigation expenses) of the Fund do not exceed 1.50%, 2.25%, 1.50% and 1.25% of the average daily net assets for Class A Shares, Class C Shares, Class T Shares and Institutional Class Shares, respectively. This agreement will remain in effect until March 31, 2018, and it may be terminated before that date only by the Board of Trustees. For the Fund's fiscal year ended November 30, 2016, such fee waiver or expense absorption was not necessary as the total annual fund expenses (excluding deferred income tax expense) were 1.46%, 2.21% and 1.21% for the Fund's Class A, Class C, and Institutional Class Shares, respectively. Class T Shares were not offered prior to April 1, 2017.

Any reduction in advisory fees or payment of the Fund's expenses made by the Advisor in a fiscal year may be reimbursed by the Fund for a period ending three full fiscal years after the date of reduction or payment if the Advisor so requests. This reimbursement may be requested from the Fund if the aggregate amount of operating expenses for such fiscal year, as accrued each month, does not exceed the lesser of (a) the limitation on Fund expenses in effect at the time of the relevant reduction in advisory fees or payment of the Fund's expenses, or (b) the limitation on Fund expenses at the time of the request. However, the reimbursement amount may not exceed the total amount of fees waived and/or Fund expenses paid by the Advisor and will not include any amounts previously reimbursed to the Advisor by the Fund. Any such reimbursement is contingent upon the Board's subsequent review of the reimbursed amounts and no reimbursement may cause the total operating expenses paid by the Fund in a fiscal year to exceed the applicable limitation on Fund expenses. The Fund must pay current ordinary operating expenses before the Advisor is entitled to any reimbursement of fees and/or Fund expenses.

In addition to receiving its advisory fee from the Fund, the Advisor or Sub-Advisor may also act and be compensated as investment manager for its clients with respect to assets they invested in the Fund. If you have a separately managed account with the Advisor or Sub-Advisor with assets invested in the Fund, the Advisor or Sub-Advisor will credit an amount equal to all or a portion of the fees received by the Advisor or Sub-Advisor against any investment management fee received from you.

Advisory Agreement

The Advisory Agreement will continue from year to year if approved annually (i) by the Board of Trustees or by the holders of a majority of the outstanding voting securities of the Fund and (ii) by a majority of the Trustees who are not "interested persons" of any party to the Advisory Agreement, by vote cast in person at a meeting called for the purpose of voting on such approval.

The Advisory Agreement provides that in the absence of a breach of fiduciary duty with respect to the receipt of compensation for services or willful misfeasance, bad faith, or gross negligence on the part of the Advisor in the performance of its duties and obligations (each, a "disqualifying act"), the Advisor is not liable for any error of judgment or mistake of law or for any loss suffered by the Funds. The Advisory Agreement is terminable without penalty by the Trust on behalf of the Fund on 60 days' written notice when authorized either by a majority vote of the Fund's shareholders or by vote of a majority of the Board, including a majority of the Independent Trustees, or by the Advisor on 60 days' written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act).

Sub-Advisory Agreement

The Sub-Advisory Agreement will continue in effect if approved annually (i) by the Board of Trustees or by the holders of a majority of the outstanding voting securities of the Fund and (ii) by a majority of the Trustees who are not "interested persons" of any party to the Sub-Advisory Agreement, by vote cast in person at a meeting called for the purpose of voting on such approval. The Sub-Advisory Agreement provides that the Sub-Advisor is not liable for any error of judgment or mistake of law or for any loss suffered by the Funds in the absence of a disqualifying act. The Sub-Advisory Agreement will automatically terminate in the event of its "assignment" (as defined in the 1940 Act), and is terminable without penalty on 60 days' written notice by the

Sub-Advisor, or by either a majority vote of the Fund's shareholders or a majority vote of the Board, including a majority of the Independent Trustees.

Other Accounts Managed by the Portfolio Managers

As of November 30, 2016, information on other accounts managed by portfolio managers is as follows:

Portfolio Managers	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in Million)	Number of Accounts	Total Assets (in Million)	Number of Accounts	Total Assets (in Million)
Dan C. Tutcher	2	\$365.9	0	\$0	977	\$800.9
Robert T. Chisholm	2	\$365.9	0	\$0	977	\$800.9
Jeff Jorgensen	2	\$365.9	0	\$0	977	\$800.9

Portfolio Managers	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in Million)	Number of Accounts	Total Assets (in Million)	Number of Accounts	Total Assets (in Million)
Dan C. Tutcher	0	\$0	1	\$73.9	0	\$0
Robert T. Chisholm	0	\$0	1	\$73.9	0	\$0
Jeff Jorgensen	0	\$0	1	\$73.9	0	\$0

Material Conflicts of Interest. Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other account. More specifically, portfolio managers who manage multiple funds and/or other accounts may be presented with one or more of the following potential conflicts:

The management of multiple funds and/or other accounts may result in a portfolio manager devoting unequal time and attention to the management of each fund and/or other account. The Sub-Advisor seeks to manage such competing interests for the time and attention of a portfolio manager by having the portfolio manager focus on a particular investment discipline.

If a portfolio manager identifies a limited investment opportunity which may be suitable for more than one fund or other account, a fund may not be able to take full advantage of that opportunity due to an allocation of filled purchase or sale orders across all eligible funds and other accounts. To deal with these situations, the Sub-Advisor has adopted procedures for allocating portfolio transactions across multiple accounts. With respect to securities transactions for the Fund, the Sub-Advisor determines which broker to use to execute each order, consistent with its duty to seek best execution of the transaction. However, with respect to certain other accounts (such as pooled investment vehicles that are not registered mutual funds, and other accounts managed for organizations and individuals), the Sub-Advisor may be limited by the client with respect to the selection of brokers or may be instructed to direct trades through a particular broker. In these cases, trades for a fund in a particular security may be placed separately from, rather than aggregated with, such other accounts. Having separate transactions with respect to a security may temporarily affect the market price of the security or the execution of the transaction, or both, to the possible detriment of a fund or other account(s) involved.

The Sub-Advisor has adopted certain compliance procedures which are designed to address these types of conflicts, including policies and procedures designed to ensure allocation of trades among all clients on a fair and equitable basis, taking into account the clients' investment objectives and the objectives set forth in the respective offering documents. Generally, all of the Sub-Advisor's investment strategies consist of a "core" energy

MLP and infrastructure component. The Fund generally holds only these core MLP and infrastructure investments, while other accounts managed by the Sub-Advisor may also invest in “opportunistic” investments. Core investments are generally longer term holdings in energy MLPs and infrastructure companies that meet certain fundamental, qualitative criteria established by the Sub-Advisor’s Investment Committee. Opportunistic investments are generally expected to be shorter term holdings and represent technical valuation trading opportunities or the participation in initial public offerings (“IPOs”) or secondary offerings in MLPs or companies deemed not to meet the criteria of a core holding. The Fund does not participate in the Sub-Advisor’s opportunistic investments. The Fund may participate in IPOs and secondary offerings only for core holdings. The portfolio managers of the Sub-Advisor determine which securities are deemed core and opportunistic and these decisions are reviewed with and confirmed by the Sub-Advisor’s Investment Committee.

Dan C. Tutcher, a portfolio manager of the Fund, presently serves on the board of Enbridge, Inc. (NYSE:ENB). As of the date of this Statement of Additional Information, Enbridge Inc. is the parent company of Enbridge Energy Management (NYSE:EEQ), Midcoast Energy Partners (NYSE: MEP), Enbridge Energy Partners (NYSE:EEP), Spectra Energy Corp (NYSE:SE), DCP Midstream Partners (NYSE: DCP) and Spectra Energy Partners (NYSE: SEP) (collectively, the “Enbridge Companies”). As a board member, Mr. Tutcher attends quarterly board meetings for Enbridge, Inc. The Fund may from time to time invest in Enbridge Companies. The Sub-Advisor has adopted policies and procedures to address potential conflicts of interest that may arise in connection with Mr. Tutcher’s service as a director of Enbridge Inc. Specifically, these policies and procedures (i) establish information barriers designed to restrict Mr. Tutcher from sharing information regarding Enbridge Companies with other investment professionals of the Sub-Advisor, (ii) require Mr. Tutcher to recuse himself from any discussions by the Sub-Advisor’s investment committee involving Enbridge Companies and (iii) require that all trading decisions regarding Enbridge Companies be made by other portfolio managers, without any input from Mr. Tutcher. While these policies and procedures are designed to allow the Fund to continue to invest in Enbridge Companies, the policies and procedures may require the Sub-Advisor to restrict trading in Enbridge Companies from time to time, which may prevent the Fund from acquiring or disposing of securities of Enbridge Companies at a favorable time. In addition, as a result of these policies and procedures, the Fund will not benefit from Mr. Tutcher’s experience and expertise with respect to investments in Enbridge Companies.

Though the Sub-Advisor has such procedures in place to address conflicts of interest, there is no guarantee that the Sub-Advisor’s procedures will detect each and every situation in which a conflict arises.

Compensation. The portfolio managers are not directly compensated for their work with respect to the Fund; however, each portfolio manager is an equity owner of the Sub-Advisor and therefore benefits indirectly from the revenue generated from the Advisory Agreement through his receipt of distributions from the Sub-Advisor. Messrs. Chisholm and Jorgensen receive a base payment from the Sub-Advisor for the services he provides. Mr. Jorgensen is also eligible for an annual cash bonus based on the Sub-Advisor’s earnings and the satisfaction of other conditions. Additional benefits received by Messrs. Chisholm and Jorgensen are normal and customary employee benefits generally available to all salaried employees. The portfolio managers are not entitled to any deferred benefits.

Ownership of the Fund by the Portfolio Managers. The following chart sets forth the dollar range of Fund shares owned by each portfolio manager as of November 30, 2016:

Name of Portfolio Manager	Dollar Range of Securities in the Fund
	(None, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, \$100,001 - \$500,000, \$500,001 - \$1,000,000, Over \$1,000,000)
Dan C. Tutcher	\$10,001 - \$50,000
Robert T. Chisholm	\$10,001 - \$50,000
Jeff Jorgensen	\$100,001 - \$500,000

Service Providers

Pursuant to a Co-Administration Agreement (the “Co-Administration Agreement”), UMB Fund Services, Inc. (“UMBFS”), 235 W. Galena Street, Milwaukee, Wisconsin 53212, and Mutual Fund Administration, LLC (“MFAC”), 2220 E. Route 66, Suite 226, Glendora, California 91740 (collectively the “Co-Administrators”), act as co-administrators for the Fund. The Co-Administrators provide certain administrative services to the Fund, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Fund’s independent contractors and agents; preparing for signature by an officer of the Trust of all documents required to be filed for compliance with applicable laws and regulations including those of the securities laws of various states; arranging for the computation of performance data, including net asset value and yield; arranging for the maintenance of books and records of the Fund; and providing, at their own expense, office facilities, equipment and personnel necessary to carry out their duties. In this capacity, the Co-Administrators do not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares. The Co-Administration Agreement provides that neither Co-Administrator shall be liable for any error of judgment or mistake of law or for any loss suffered by the Trust or its series, except for losses resulting from a Co-Administrator’s willful misfeasance, bad faith or negligence in the performance of its duties or from reckless disregard by it of its obligations and duties under the Agreement.

As compensation for their services, the Fund pays the Co-Administrators an administration fee payable monthly at the annual rate set forth below as a percentage of the Fund’s average daily net assets:

Net Assets	Rate
First \$500 million	0.06%
Assets over \$500 million	0.05%

The Fund paid the following co-administrator fees:

	Co-Administration Fees
For the fiscal year ended November 30, 2016	\$1,218,806
For the fiscal year ended November 30, 2015	\$1,573,217
For the fiscal year ended November 30, 2014	\$1,360,448

UMBFS also acts as the Trust’s fund accountant, transfer agent and dividend disbursing agent pursuant to separate agreements.

UMB Bank, n.a. (the “Custodian”), an affiliate of UMBFS, is the custodian of the assets of the Fund pursuant to a custody agreement between the Custodian and the Trust, whereby the Custodian provides services for fees on a transactional basis plus out-of-pocket expenses. The Custodian’s address is 928 Grand Boulevard, Kansas City, Missouri 64106. The Custodian does not participate in decisions pertaining to the purchase and sale of securities by the Fund.

Tait, Weller & Baker LLP (“Tait Weller”), 1818 Market Street, Suite 2400, Philadelphia, Pennsylvania 19103 is the independent registered public accounting firm for the Fund. Its services include auditing the Fund’s financial statements and the performance of related tax services.

Morgan, Lewis & Bockius LLP (“Morgan Lewis”), 300 South Grand Avenue, 22nd Floor, Los Angeles, California 90071, serves as legal counsel to the Trust

Paul Hastings LLP (“Paul Hastings”), 55 Second Street, 24th Floor, San Francisco, California 94105, serves as legal counsel to the Independent Trustees.

Distribution Agreement

Foreside Fund Services, LLC is the distributor (also known as the principal underwriter) of the shares of the Fund and is located at Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority (“FINRA”). The Distributor is not affiliated with the Trust, the Advisor, the Sub-Advisor or any other service provider for the Fund.

Under a Distribution Agreement with the Trust dated September 30, 2014 (the “Distribution Agreement”), the Distributor acts as the agent of the Trust in connection with the continuous offering of shares of the Fund. The Distributor continually distributes shares of the Fund on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of shares of the Fund. With respect to certain financial intermediaries and related fund “supermarket” platform arrangements, the Fund and/or the Advisor, rather than the Distributor, typically enter into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, redemption and other requests to the Fund.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to customers by the financial intermediary through which they purchase shares. Investors purchasing shares of the Fund through financial intermediaries should acquaint themselves with their financial intermediary’s procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not its customers, will be the shareholder of record, although customers may have the right to vote shares depending upon their arrangement with the financial intermediary. The Distributor does not receive compensation from the Fund for its distribution services except the distribution/service fees with respect to the shares of those classes for which a Rule 12b-1 distribution plan is effective. The Advisor pays the Distributor a fee for certain distribution-related services.

The Distribution Agreement will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund’s outstanding voting securities in accordance with the 1940 Act. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Fund on no less than 60 days’ written notice when authorized either by a vote of a majority of the outstanding voting securities of the Fund or by vote of a majority of the members of the Board who are not “interested persons” (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the operation of the Distribution Agreement, or by the Distributor, and will automatically terminate in the event of its “assignment” (as defined in the 1940 Act). The Distribution Agreement provides that the Distributor shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the performance of the Distributor’s obligations and duties under the Distribution Agreement, except a loss resulting from the Distributor’s willful misfeasance, bad faith or gross negligence in the performance of such duties and obligations, or by reason of its reckless disregard thereof.

The following table shows the aggregate amount of brokerage commissions paid and amounts received by the Distributor:

Class	Amount of Commissions	Amount Received
Class A	\$2,294,393	\$0

The Distributor does not retain sales charges for the sale of the Fund's Class A Shares. Pursuant to the Distribution Agreement, should amounts be retained by the Distributor, such amounts would not be held for profit at the Distributor, but instead would be used solely for distribution-related expenditures.

Rule 12b-1 Plan

The Trust has adopted a plan pursuant to Rule 12b-1 under the 1940 Act (the "12b-1 Plan") that provides for Fund assets to be used for the payment for distribution services for Class A Shares, Class C Shares and Class T Shares. The 12b-1 Plan provides alternative methods for paying sales charges and may help the Fund grow or maintain asset levels to provide operational efficiencies and economies of scale. The 12b-1 Plan also provides for the payment of service fees in connection with the provision of post-sales shareholder liaison services to holders of Class A Shares, Class C Shares and Class T Shares, as defined in FINRA regulations, including personal services such as responding to customer inquiries, and services related to the maintenance of shareholder accounts. Because 12b-1 fees are paid out of Fund assets attributable to Class A Shares, Class C Shares and Class T Shares on an ongoing basis, they will, over time, increase the cost of an investment and may cost more than other types of sales charges. The 12b-1 Plan is a compensation plan, which means that the Distributor is compensated regardless of its expenses, as opposed to a reimbursement plan which reimburses only for expenses incurred. The Distributor does not retain any 12b-1 fees for profit. All 12b-1 fees are held in a retention account by the Distributor to pay for and/or reimburse the Fund, the Advisor and its related parties for distribution-related expenditures.

The 12b-1 Plan provides that the distribution fees paid by each of Class A Shares, Class C Shares and Class T Shares of the Fund may be used to pay for any expenses primarily intended to result in the sale of shares of such Class, including, but not limited to: (a) costs of payments, including incentive compensation, made to agents for and consultants to the Distributor, including pension administration firms that provide distribution services and broker-dealers that engage in the distribution of the shares of such Class of the Fund; (b) payments made to, and expenses of, persons who provide support services in connection with the distribution of shares of such Class of the Fund; (c) payments made pursuant to any dealer agreements between the Distributor and certain broker-dealers, financial institutions and other service providers with respect to such Class of the Fund; (d) costs relating to the formulation and implementation of marketing and promotional activities; (e) costs of printing and distributing prospectuses, statements of additional information and reports of the Fund to prospective shareholders of such Class of the Fund; (f) costs involved in preparing, printing and distributing sales literature pertaining to such Class of the Fund; (g) costs involved in obtaining such information, analyses and reports with respect to marketing and promotional activities that the Trust may deem advisable with respect to such Class of the Fund; and (h) reimbursement to the Advisor for expenses advanced on behalf of the Fund or Class with respect to such activities. Such expenses shall be deemed incurred whether paid directly by the Distributor or by a third party to the extent reimbursed therefor by the Distributor.

The 12b-1 Plan provides that the administrative service fees paid by Class A, Class C or Class T Shares of the Fund may be used to pay for any administrative expenses that are not primarily intended to result in the sale of shares of such Class and are not otherwise provided by the Trust's transfer agency or other servicing arrangements, including: (a) establishing and maintaining accounts and records; (b) processing purchase and redemption transactions; (c) answering routine inquiries regarding the Fund and its special features; (d) providing assistance to investors in changing dividend and investment options, account designations and addresses; and (e) such other administrative services as the Fund or the Distributor may reasonably request.

The 12b-1 Plan may not be amended to materially increase the amount to be paid by the Fund's Class A Shares, Class C Shares or Class T Shares for distribution services without the vote of a majority of the outstanding voting securities of such shares. The 12b-1 Plan shall continue in effect indefinitely with respect to a Class, provided that such continuance is approved at least annually by a vote of a majority of the Trustees, including the Independent Trustees, cast in person at a meeting called for such purpose or by vote of at least a majority of the outstanding voting securities of such Class. The 12b-1 Plan may be terminated with respect to a Class at any time without penalty by vote of a majority of the Independent Trustees or by vote of the majority of the outstanding voting securities of such Class.

If the 12b-1 Plan is terminated for the Fund’s Class A Shares, Class C Shares or Class T Shares in accordance with its terms, the obligation of the Fund to make payments pursuant to the 12b-1 Plan will cease and the Fund will not be required to make any payments past the termination date. Thus, there is no legal obligation for the Fund to pay any expenses incurred by the Distributor other than fees already payable under the 12b-1 Plan, if the 12b-1 Plan is terminated in accordance with its terms for any reason.

The following table shows the 12b-1 fees paid pursuant to the 12b-1 Plan:

	12-1 Fees (\$)
Class A	993,998
Class C	7,546,986

Class T Shares were not offered prior to April 1, 2017.

Shareholder Service Plan

The Board has adopted, on behalf of the Fund, a Shareholder Service Plan (the “Service Plan”) under which the Advisor will provide or arrange for others (such as banks, trust companies, broker-dealers or other financial intermediaries (each, a “Service Organization”)) to provide certain specified non-distribution shareholder servicing functions for Fund shares owned by its respective customers, including but not limited to (a) establishing and maintaining accounts and records relating to customers who invest in the Fund; (b) aggregating and processing orders involving Fund shares; (c) processing dividend and other distribution payments from the Fund on behalf of customers; (d) preparing tax reports or forms on behalf of customers; (e) forwarding communications from the Fund; (f) providing sub-accounting with respect to Fund shares; (g) providing customers with a service that invests the assets of their accounts in Fund shares pursuant to specific or pre-authorized instructions; and (h) providing such other similar services as the Advisor may reasonably request to the extent it or a Service Organization is permitted to do so under applicable statutes, rules or regulations. The Fund will pay the Advisor or Service Organizations, as applicable, at an annual rate of up to 0.15% of the Fund’s average daily net assets, payable monthly. For the fiscal year ended November 30, 2016, the Fund paid \$2,069,179 in shareholder servicing fees.

Marketing and Support Payments

The Advisor or the Sub-Advisor, out of its own resources and without additional cost to the Fund or its shareholders, may provide cash payments to certain financial intermediaries who sell shares of the Fund. These payments are in addition to other fees described in the Fund’s Prospectus and this SAI, and are generally provided for shareholder services or marketing support. Payments for marketing support are typically for inclusion of the Fund on sales lists, including electronic sales platforms. Investors may wish to take these payments into account when considering and evaluating recommendations to purchase shares of the Fund.

Dealer Reallowances

The Fund’s Class A and Class T shares are subject to a sales charge that includes a dealer reallowance, which varies depending on how much the shareholder invests. The Distributor pays the appropriate dealer reallowance to dealers who have entered into an agreement with the Distributor to sell shares of the Fund. The Advisor’s affiliated broker-dealer, HRC Fund Associates, LLC (“HRC”) may receive sales charges from the Fund’s Distributor for activities relating to the marketing of Fund shares pursuant to a wholesaling agreement with the Fund’s Distributor. For the fiscal year ended November 30, 2016 HRC received \$11,517 in sales charges from the Distributor for services rendered pursuant to the wholesaling agreement from 2011 through 2013 with respect to the Fund. In addition, HRC markets the Fund shares pursuant to a marketing agreement with the Advisor. The Advisor pays HRC out of its own resources and without additional cost to the Fund or its shareholders. Under both the wholesaling agreement and the marketing agreement, HRC markets the Fund to financial intermediaries, who in turn may recommend the Fund for purchase to their clients. HRC may also market the Fund to institutional investors. More detailed information on the sales charge and its application is contained in

the Prospectus.

PORTFOLIO TRANSACTIONS AND BROKERAGE

The Sub-Advisor determines which securities are to be purchased and sold by the Fund and which broker-dealers are eligible to execute the Fund's portfolio transactions. The purchases and sales of securities in the over-the-counter market will generally be executed by using a broker for the transaction.

Purchases of portfolio securities for the Fund also may be made directly from issuers or from underwriters. When possible, purchase and sale transactions will be effected through dealers (including banks) that specialize in the types of securities which the Fund will be holding unless better executions are available elsewhere. Dealers and underwriters usually act as principals for their own accounts. Purchases from underwriters will include a concession paid by the issuer to the underwriter and purchases from dealers will include the spread between the bid and the asked price. If the execution and price offered by more than one dealer or underwriter are comparable, the order may be allocated to a dealer or underwriter that has provided research or other services as discussed below.

In placing portfolio transactions, the Sub-Advisor will use its reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the broker-dealer involved, the risk in positioning the block of securities, and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers which furnish or supply research and statistical information to the Sub-Advisor that they may lawfully and appropriately use in their investment advisory capacities, as well as provide other services in addition to execution services. The Sub-Advisor considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Sub-Advisory Agreement with the Fund, to be useful in varying degrees, but of indeterminable value.

While it is the Fund's general policy to seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund, weight is also given to the ability of a broker-dealer to furnish brokerage and research services as defined in Section 28(e) of the Securities Exchange Act of 1934, as amended, to the Fund or to the Sub-Advisor, even if the specific services are not directly useful to the Fund and may be useful to the Sub-Advisor in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Sub-Advisor to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Sub-Advisor's overall responsibilities to the Fund.

Investment decisions for the Fund are made independently from those of other client accounts that may be managed or advised by the Sub-Advisor. Nevertheless, it is possible that at times, identical securities will be acceptable for both the Fund and one or more of such client accounts. In such event, the position of the Fund and such client accounts in the same issuer may vary and the holding period may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as the Fund at the same time, the Fund may not be able to acquire as large a position in such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time as the Sub-Advisor's other client accounts. If one or more of such client accounts simultaneously purchases or sells the same security that the Fund is purchasing or selling, each day's transactions in such security will be allocated between the Fund and all such client accounts in a manner deemed equitable by the Sub-Advisor, taking into account the respective sizes of the accounts, the amount being purchased or sold in relation to Sub-Advisor's target position in that particular security for the Fund and the client accounts, and cash position. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Fund is concerned. In other

cases, however, it is believed that the ability of the Fund to participate in volume transactions may produce better executions for the Fund.

The Fund does not effect securities transactions through brokers in accordance with any formula, nor does it effect securities transactions through brokers in recognition of the broker's sale of Fund shares. However, broker-dealers who execute brokerage transactions may effect purchase of shares of the Fund for their customers.

The Fund paid the following brokerage commissions:

	Broker Commissions
For the fiscal year ended November 30, 2016	\$1,383,137
For the fiscal year ended November 30, 2015	\$1,324,519
For the fiscal year ended November 30, 2014	\$1,390,016

For the fiscal years ended November 30, 2014, November 30, 2015 and November 30, 2016, the Fund did not have any soft dollar arrangements with any brokers.

PORTFOLIO TURNOVER

Although the Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Sub-Advisor, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in the Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and may result in a greater number of taxable transactions. To the extent net short-term capital gains are realized, any distributions resulting from such gains will generally be taxed at ordinary income tax rates for federal income tax purposes.

The Fund's portfolio turnover rate for the fiscal years ended November 30, 2016 and November 30, 2015 were 60% and 51%, respectively.

SECURITIES OF REGULAR BROKER-DEALERS

From time to time, the Fund may acquire and hold securities issued by its "regular brokers and dealers" or the parents of those brokers and dealers. For this purpose, regular brokers and dealers are the ten brokers or dealers that: (1) received the greatest amount of brokerage commissions during the Fund's last fiscal year; (2) engaged in the largest amount of principal transactions for portfolio transactions of the Fund during the Fund's last fiscal year; or (3) sold the largest amount of the Fund's shares during the Fund's last fiscal year. The Fund did not hold any securities of any "regular broker-dealers" during the fiscal year ended November 30, 2016.

PROXY VOTING POLICY

The Board has adopted Proxy Voting Policies and Procedures ("Trust Policies") on behalf of the Trust, which delegates the responsibility for voting the Fund's proxies to the Sub-Advisor, subject to the Board's continuing oversight. The Trust Policies require that the Sub-Advisor vote proxies received in a manner consistent with the best interests of the Fund. The Trust Policies also require the Sub-Advisor to present to the Board, at least annually, the Sub-Advisor's Proxy Voting Policies and Procedures ("Sub-Advisor Policies") and a record of each proxy voted by the Sub-Advisor on behalf of the Fund, including a report on the resolution of all proxies identified by the Sub-Advisor as involving a conflict of interest. See Appendix B for the Trust Policies and Sub-Advisor Policies. The Trust Policies and Sub-Advisor Policies are intended to serve as a guideline and to further the economic value of each security held by the Fund. The Trust's CCO will review Trust Policies and

Sub-Advisor Policies annually. Each proxy will be considered individually, taking into account the relevant circumstances at the time of each vote.

If a proxy proposal raises a material conflict between the Sub-Advisor's interests and the Fund's interests, the Sub-Advisor will resolve the conflict by following the policy guidelines or the recommendation of an independent third party.

The Fund is required to annually file Form N-PX, which lists the Fund's complete proxy voting record for the 12-month period ending June 30 each year. Once filed, the Fund's proxy voting record will be available without charge, upon request, by calling the Fund at (800) 207-7108 and on the SEC's web site at www.sec.gov.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). In order to ensure compliance with this law, the Program provides for the development and implementation of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Distributor and the Fund's transfer agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, checking shareholder names against designated government lists, including Office of Foreign Assets Control ("OFAC"), and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

PORTFOLIO HOLDINGS INFORMATION

The Trust has adopted policies and procedures regarding disclosure of portfolio holdings information (the "Disclosure Policy"). The Board of Trustees determined that the adoption of the Disclosure Policy, including the disclosure permitted therein, was in the best interests of the Trust. The Disclosure Policy applies to the Fund, Advisor, Sub-Advisor and other internal parties involved in the administration, operation or custody of the Fund, including, but not limited to UMBFS, MFAC, the Board of Trustees, counsel to the Trust, Morgan Lewis, counsel to the Independent Trustees, Paul Hastings, and the Fund's independent registered public accounting firm, Tait, Weller (collectively, the "Service Providers"). Pursuant to the Disclosure Policy, non-public information concerning the Fund's portfolio holdings may be disclosed to its Service Providers only if such disclosure is consistent with the antifraud provisions of the federal securities laws and the fiduciary duties owed by the Fund and the Advisor or Sub-Advisor to the Fund's shareholders. The Fund and its Service Providers may not receive compensation or any other consideration (which includes any agreement to maintain assets in the Fund or in other investment companies or accounts managed by the Advisor, Sub-Advisor or any affiliated person of the Advisor or Sub-Advisor) in connection with the disclosure of portfolio holdings information of the Fund. The Fund's Disclosure Policy is implemented and overseen by the CCO of the Trust, subject to the oversight of the Board of Trustees. Periodic reports regarding these procedures will be provided to the Trust's Board.

Portfolio holdings information will be deemed public when it has been (1) posted to the Fund's public website (www.libertystreetfunds.com) or (2) disclosed in periodic regulatory filings on the SEC's website (www.sec.gov). Management of the Fund may make publicly available its portfolio holdings on the Fund's website no earlier than five days following the effective date of such information (e.g., information as of January 31 may be made available no earlier than February 5).

Non-Public Portfolio Holdings Information Policy. All portfolio holdings information that has not been disseminated in a manner making it available to investors generally as described above is considered non-public portfolio holdings information for the purposes of the Disclosure Policy. Pursuant to the Disclosure Policy, the Fund or its Service Providers may disclose non-public portfolio holdings information to certain third parties who

fall within pre-authorized categories on a daily basis, with no lag time unless otherwise specified below. These third parties include: (i) the Fund's Service Providers and others who need access to such information in the performance of their contractual or other duties and responsibilities to the Fund (e.g., custodians, accountants, the Advisor, administrators, attorneys, officers and Trustees) and who are subject to duties of confidentiality imposed by law or contract, (ii) brokers who execute trades for the Fund, (iii) evaluation service providers (as described below) and (iv) shareholders receiving in-kind redemptions (as described below).

Evaluation Service Providers. These third parties include mutual fund evaluation services, such as Morningstar, Inc. and Lipper, Inc., if the Fund has a legitimate business purpose for disclosing the information, provided that the third party expressly agrees to maintain the non-public portfolio holdings information in confidence and not to trade portfolio securities based on the non-public portfolio holdings information. Subject to the terms and conditions of any agreement between the Fund or its authorized service providers and the third party, if these conditions for disclosure are satisfied, there shall be no restriction on the frequency with which the Fund's non-public portfolio holdings information is released, and no lag period shall apply. In addition, persons who owe a duty of trust or confidence to the Fund or its Service Providers (such as legal counsel) may receive non-public portfolio holdings information without entering into a non-disclosure agreement.

Shareholder In-Kind Distributions. The Fund may, in certain circumstances, pay redemption proceeds to a shareholder by an in-kind distribution of portfolio securities (instead of cash). In such circumstances, pursuant to the Disclosure Policy, Fund shareholders may receive a complete listing of the portfolio holdings of the Fund up to seven (7) calendar days prior to making the redemption request provided that they represent orally or in writing that they agree to maintain the confidentiality of the portfolio holdings information and not to trade portfolio securities based on the non-public holdings information.

Other Entities. Pursuant to the Disclosure Policy, the Fund or the Advisor may disclose non-public portfolio holdings information to a third party who does not fall within the pre-approved categories, and who are not executing broker-dealers; however, prior to the receipt of any non-public portfolio holdings information by such third party, the recipient must have entered into a non-disclosure agreement and the disclosure arrangement must have been approved by the CCO of the Trust. The CCO will report to the Board of Trustees on a quarterly basis regarding any recipients of non-public portfolio holdings information approved pursuant to this paragraph. There are no other ongoing arrangements as of the date of this SAI.

The Advisor, the Sub-advisor and their affiliates may provide investment advice to clients other than the Fund that have investment objectives that may be substantially similar to those of the Fund. These clients also may have portfolios consisting of holdings substantially similar to those of the Fund and generally have access to current portfolio holdings information for their accounts. These clients do not owe the Advisor, the Sub-Advisor or the Fund a duty of confidentiality with respect to disclosure of their portfolio holdings.

Current Arrangements Regarding Disclosure of Portfolio Holdings As of the date of this SAI, the Trust or the Fund has on-going business arrangements with the following entities which involve making portfolio holdings information available to such entities as an incidental part of the services they provide to the Trust: (i) Liberty Street Advisors, Inc. (the Advisor), Center Coast Capital Advisors, LP (the Sub-Advisor), MFAC and UMBFS (the Co-Administrators) and UMB Bank, n.a. (the Custodian) pursuant to investment management, sub-advisory, administration and custody agreements, respectively, under which the Fund's portfolio holdings information is provided daily on a real-time basis (i.e., with no lag time); (ii) Tait, Weller (Independent Registered Public Accounting firm), Morgan Lewis and Paul Hastings (attorneys) and other professionals engaged by the Trust to whom the Trust provides portfolio holdings information on a regular basis with varying lag times after the date of the information, and (iii) Morningstar, Inc., Lipper Inc., Thomson Financial, Vickers Stock Research Corporation, and Bloomberg L.P., to which the Fund's portfolio holdings information is provided quarterly after the end of the previous fiscal quarter, with a 60-day time lag and no earlier than the date such information is filed on the SEC's EDGAR system on Form N-Q (for the first and third fiscal quarters) or the Annual or Semi-Annual Report is mailed to shareholders (for the second and fourth fiscal quarters), as applicable.

DETERMINATION OF NET ASSET VALUE

The NAV of each class of the Fund's shares will fluctuate and is determined as of 4:00 p.m. Eastern Time, the normal close of regular trading on the New York Stock Exchange (the "NYSE") on each day the NYSE is open for trading. The NAVs may be calculated earlier if trading on the NYSE is restricted or if permitted by the SEC. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that the NYSE will not be open for the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement.

The NAV of each class is computed by dividing (a) the difference between the value of the Fund's securities, cash and other assets and the amount of the Fund's expenses and liabilities attributable to the class by (b) the number of shares outstanding in that class (assets - liabilities / # of shares = NAV). Each NAV takes into account all of the expenses and fees of that class of the Fund, including management fees and administration fees, which are accrued daily.

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{NAV}$$

An example of how the Fund calculated the NAV as of November 30, 2016, is as follows (Class T Shares had not commenced operations prior to the date of this SAI):

Class A Shares		
\$451,899,803		
54,891,300		\$8.23
 Class C Shares		
\$796,541,703		
102,723,075		\$7.75
 Institutional Class		
\$1,353,904,411	=	
162,244,714		\$8.34

Generally, the Fund's investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Sub-Advisor and the Trust's Valuation Committee pursuant to procedures approved by or under the direction of the Board. Pursuant to those procedures, the Board considers, among other things: 1) the last sale price on the securities exchange, if any, on which a security is primarily traded; 2) the mean between the bid and ask prices; 3) price quotations from an approved pricing service, and 4) other factors as necessary to determine a fair value under certain circumstances.

The Fund's securities which are traded on securities exchanges are valued at the last sale price on the exchange on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any reported sales, at the mean between the last available bid and ask prices.

Securities that are traded on more than one exchange are valued on the exchange determined by the Sub-Advisor to be the primary market. Securities primarily traded in the National Association of Securities Dealers Automated Quotation ("NASDAQ"), National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price ("NOCP"). If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has not been any sale on such day, at the mean between the bid and ask prices. Over-the-counter ("OTC") securities which are not traded in the NASDAQ National Market System shall be valued at the most recent trade price.

Stocks that are “thinly traded” or events occurring when a foreign market is closed but the NYSE is open (for example, the value of a security held by the Fund has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded) may create a situation where a market quote would not be readily available. When a market quote is not readily available, the security’s value is based on “fair value” as determined by procedures adopted by the Board. The Board will periodically review the reliability of the Fund’s fair value methodology. The Fund may hold portfolio securities, such as those traded on foreign securities exchanges that trade on weekends or other days when the Fund’s shares are not priced. Therefore, the value of the Fund’s shares may change on days when shareholders will not be able to purchase or redeem shares.

Short-term debt obligations with remaining maturities in excess of 60 days are valued at current market prices, as discussed above. Short-term securities with 60 days or less remaining to maturity are, unless conditions indicate otherwise, amortized to maturity based on their cost to the Fund if acquired within 60 days of maturity or, if already held by the Fund on the 60th day, based on the value determined on the 61st day.

All other assets of the Fund are valued in such manner as the Board in good faith deems appropriate to reflect as their fair value.

PURCHASE AND REDEMPTION OF FUND SHARES

Detailed information on the purchase and redemption of shares is included in the Fund’s Prospectus. Shares of the Fund are sold at the next offering price calculated after receipt of an order for purchase. In order to purchase shares of the Fund, you must invest the initial minimum investment for the relevant class of shares. However, the Fund reserves the right, in its sole discretion, to waive the minimum initial investment amount for certain investors, or to waive or reduce the minimum initial investment for 401(k) plans or other tax-deferred retirement plans. You may purchase shares on any day that the NYSE is open for business by placing orders with the Fund.

The Fund reserves the right to refuse any purchase requests, particularly those that would not be in the best interests of the Fund or its shareholders and could adversely affect the Fund or its operations. This includes those from any individual or group who, in the Fund’s view, is likely to engage in or has a history of excessive trading (usually defined as more than four round-trip transactions out of the Fund within a calendar year). Furthermore, the Fund may suspend the right to redeem its shares or postpone the date of payment upon redemption for more than seven calendar days (i) for any period during which the NYSE is closed (other than customary weekend or holiday closings) or trading on the NYSE is restricted; (ii) for any period during which an emergency exists affecting the sale of the Fund’s securities or making such sale or the fair determination of the value of the Fund’s net assets not reasonably practicable; or (iii) for such other periods as the SEC may permit for the protection of the Fund’s shareholders. In addition, if shares are purchased using a check and a redemption is requested before the check has cleared, the Fund may postpone payment of the redemption proceeds up to 15 days while the Fund waits for the check to clear.

Redemptions In Kind. The Trust has filed an election under SEC Rule 18f-1 committing to pay in cash all redemptions by a shareholder of record up to amounts specified by the rule (the lesser of (i) \$250,000 or (ii) 1% of the Fund’s assets). The Fund has reserved the right to pay the redemption price of its shares in excess of the amounts specified by the rule, either totally or partially, by an in-kind distribution of portfolio securities (instead of cash). The securities so distributed would be valued at the same amounts as those assigned to them in calculating the NAV for the Fund shares being redeemed. If a shareholder receives an in-kind distribution, the shareholder could incur brokerage or other charges in converting the securities to cash.

The Fund does not intend to hold any significant percentage of its portfolio in illiquid securities, although the Fund, like virtually all mutual funds, may from time to time hold a small percentage of securities that are illiquid. In the unlikely event the Fund were to elect to make an in-kind redemption, the Fund expects that it would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If the Fund held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or the Fund may determine, based on a materiality assessment, not to include illiquid securities

in the in-kind redemption. The Fund does not anticipate that it would ever selectively distribute a greater than pro rata portion of any illiquid securities to satisfy a redemption request. If such securities were included in the distribution, shareholders may not be able to liquidate such securities and may be required to hold such securities indefinitely. Shareholders' ability to liquidate such securities distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such securities distributed in-kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these securities by the recipient.

U.S. FEDERAL INCOME TAX CONSIDERATIONS

This section and the discussion in the Prospectus (see section headed "Taxation") provide a summary of certain U.S. federal income tax considerations generally applicable to U.S. Shareholders (as defined in the Prospectus) that acquire shares pursuant to this offering and that hold such shares as capital assets (generally, for investment). The discussion is based upon the Code, Treasury Regulations, judicial authorities, published rulings and procedures of the Internal Revenue Service (the "IRS") and other applicable authorities, all as in effect on the date hereof and all of which are subject to change or differing interpretations (possibly with retroactive effect). This summary does not address all of the potential U.S. federal income tax consequences that may be applicable to the Fund, nor does it address all categories of investors (for example, non-U.S. investors), some of which may be subject to special tax rules. No ruling has been or will be sought from the IRS regarding any matter discussed herein. No assurance can be given that the IRS would not assert, or that a court would not sustain, a position contrary to any of the tax aspects set forth below. Prospective investors must consult their own tax advisors as to the U.S. federal income tax consequences of acquiring, holding and disposing of shares, as well as the effects of state, local and non-U.S. tax laws.

The Fund

The Fund is not and will not be eligible to elect to be treated as a regulated investment company under the Code because a regulated investment company cannot invest more than 25% of its assets in certain types of publicly traded partnerships (such as MLPs in which the Fund invests). As a result, the Fund is treated as a regular corporation, or "C" corporation, for U.S. federal income tax purposes, and generally is subject to U.S. federal income tax on its taxable income at the graduated rates applicable to corporations (at a maximum rate of 35%). In addition, as a regular corporation, the Fund may be subject to state and local taxes in multiple states by reason of its investments in equity securities of MLPs. Therefore, the Fund may have state and local tax liabilities in multiple states, which will reduce the Fund's cash available to make distributions on the shares. The Fund may be subject to a 20% federal alternative minimum tax on its alternative minimum taxable income to the extent that the alternative minimum tax exceeds the Fund's regular federal income tax liability. The extent to which the Fund is required to pay U.S. federal, state or local corporate income, franchise, alternative minimum or other corporate taxes could materially reduce the Fund's cash available to make distributions on the shares.

Certain Fund Investments

MLP Equity Securities. MLPs are similar to corporations in many respects, but differ from them in others, especially in the way they are treated for U.S. federal income tax purposes. A corporation is required to pay U.S. federal income tax on its income, and, to the extent the corporation distributes its income to its shareholders in the form of dividends from earnings and profits, its shareholders are required to pay U.S. federal income tax on such dividends. For this reason, it is said that corporate income is taxed at two levels. An MLP is generally not subject to tax as a corporation. An MLP is treated for U.S. federal income tax purposes as a partnership, which means no U.S. federal income tax is paid by the MLP. A partnership's income, gains, losses, expenses and tax credits are in effect considered earned by all of its partners and are generally allocated among all the partners in proportion to their interests in the partnership. Each partner takes into account in its own tax return its share of the partnership's income, gains, losses, expenses and tax credits, and is responsible for any resulting tax liability, regardless of whether the partnership distributes cash to the partners. A cash distribution from a partnership is not itself taxable to the extent it does not exceed the distributee partner's tax basis in its partnership interest and is generally treated as capital gain to the extent any cash distributed to a partner exceeds the partner's tax basis (see

description below as to how an MLP investor's tax basis is calculated) in the partnership. Partnership income is thus said to be taxed only at one level—at the partner level.

MLPs are publicly traded partnerships under the Code. The Code generally requires publicly traded partnerships to be treated as corporations for U.S. federal income tax purposes. If, however, a publicly traded partnership satisfies certain requirements, the publicly traded partnership will be treated as a partnership for U.S. federal income tax purposes. Specifically, if a publicly traded partnership receives 90 percent or more of its income from qualifying sources, such as interest, dividends, real estate rents, gain from the sale or disposition of real property, income and gain from certain mineral or natural resources activities, income and gain from the transportation or storage of certain fuels, gain from the sale or disposition of a capital asset held for the production of such income, and, in certain circumstances, income and gain from commodities or futures, forwards and options with respect to commodities, then the publicly traded partnership will be treated as a partnership for federal income tax purposes. Mineral or natural resources activities include exploration, development, production, mining, processing, refining, marketing and transportation (including pipelines), of oil and gas, minerals, geothermal energy, fertilizers, timber or industrial source carbon dioxide. The MLPs in which the Fund will invest are expected to be treated as partnerships for tax purposes.

To the extent that the Fund invests in the equity securities of an MLP, the Fund will be a partner in such MLP. Accordingly, the Fund will be required to take into account the Fund's allocable share of the income, gains, losses, deductions, expenses and credits recognized by each such MLP, regardless of whether the MLP distributes cash to the Fund. As described above, MLP distributions to partners are not taxable unless the cash amount distributed exceeds the distributee partner's basis in its MLP interest. The Fund expects that the cash distributions it will receive with respect to its investments in equity securities of MLPs will exceed the net taxable income allocated to the Fund from such MLPs because of tax deductions such as depreciation, amortization and depletion that will be allocated to the Fund from the MLPs. No assurance, however, can be given in this regard. If this expectation is not realized, the Fund will have a larger corporate income tax expense than expected, which will result in less cash available to distribute to shareholders.

The Fund will recognize gain or loss on the sale, exchange or other taxable disposition of its portfolio assets, including equity securities of MLPs, equal to the difference between the amount realized by the Fund on the sale, exchange or other taxable disposition and the Fund's adjusted tax basis in such assets. Any such gain will be subject to U.S. federal income tax at the regular graduated corporate rates (at a maximum rate of 35%), regardless of how long the Fund has held such assets. The amount realized by the Fund in any case generally will be the amount paid by the purchaser of the asset plus, in the case of MLP equity securities, the Fund's allocable share, if any, of the MLP's debt that will be allocated to the purchaser as a result of the sale, exchange or other taxable disposition. The Fund's tax basis in its equity securities in an MLP is generally equal to the amount the Fund paid for the equity securities, (x) increased by the Fund's allocable share of the MLP's net taxable income and certain MLP debt, if any, and (y) decreased by the Fund's allocable share of the MLP's net losses and any distributions received by the Fund from the MLP. Although any distribution by an MLP to the Fund in excess of the Fund's allocable share of such MLP's net taxable income may create a temporary economic benefit to the Fund, such distribution will decrease the Fund's tax basis in its MLP investments and will therefore increase the amount of gain (or decrease the amount of loss) that will be recognized on the sale of an equity security in the MLP by the Fund. A portion of any gain or loss recognized by the Fund on a disposition of an MLP equity security (or by an MLP on a disposition of an underlying asset) may be separately computed and taxed as ordinary income or loss under the Code to the extent attributable to assets of the MLP that give rise to depreciation recapture, intangible drilling and development cost recapture, or other "unrealized receivables" or "inventory items" under the Code. Any such gain may exceed net taxable gain realized on the disposition and will be recognized even if there is a net taxable loss on the disposition. As a corporation, the Fund's capital gains will be taxed at ordinary income rates, so treatment of gains as ordinary income will not cause the gains to be taxed at a higher rate. Nevertheless, the Fund's net capital losses may only be used to offset capital gains and therefore could not be used to offset gains that are treated as ordinary income. Thus, the Fund could recognize both gain that is treated as ordinary income and a capital loss on a disposition of an MLP equity security (or on an MLP's disposition of an underlying asset) and would not be able to use the capital loss to offset that gain.

Any capital losses that the Fund recognizes on a disposition of an equity security of an MLP can only be used to offset capital gains that the Fund recognizes. Any capital losses that the Fund is unable to use may be carried back for three taxable years and forward for five taxable years to reduce the Fund's capital gains in such years. Because (i) the periods for which capital losses may be carried back and forward are limited and (ii) the disposition of an equity security of an MLP may be treated, in significant part, as ordinary income, capital losses incurred by the Fund may expire without being utilized.

The Fund's allocable share of certain percentage depletion deductions and intangible drilling costs of the MLPs in which the Fund invests may be treated as items of tax preference for purposes of calculating the Fund's alternative minimum taxable income. Such items may increase the Fund's alternative minimum taxable income and increase the likelihood that the Fund may be subject to the alternative minimum tax.

Other Investments. The Fund's transactions in foreign currencies, forward contracts, options and futures contracts (including options and futures contracts on foreign currencies), to the extent permitted, will be subject to special provisions of the Code (including provisions relating to "hedging transactions" and "straddles") that, among other things, may affect the character of gains and losses recognized by the Fund (i.e., may affect whether gains or losses are ordinary versus capital or short-term versus long-term), accelerate recognition of income to the Fund and defer Fund losses. These provisions also (a) may require the Fund to mark-to-market certain types of the positions in its portfolio (i.e., treat them as if they were closed out at the end of each year) and (b) may cause the Fund to recognize income prior to receiving corresponding amounts of cash.

If the Fund invests in debt obligations having original issue discount, the Fund may recognize taxable income from such investments in excess of any cash received therefrom.

Foreign Investments. Dividends or other income (including, in some cases, capital gains) received by the Fund from investments in foreign securities may be subject to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may reduce or eliminate such taxes in some cases. Foreign taxes paid by the Fund will reduce the return from the Fund's investments. Shareholders will not be entitled to claim credits or deductions on their own tax returns for foreign taxes paid by the Fund.

U.S. Shareholders

Distributions. Distributions by the Fund of cash or property in respect of the shares will be treated as dividends for U.S. federal income tax purposes to the extent paid from the Fund's current or accumulated earnings and profits (as determined under U.S. federal income tax principles) and will be includible in gross income by a U.S. Shareholder upon receipt. Any such dividend will be eligible for the dividends received deduction if received by an otherwise qualifying corporate U.S. Shareholder that meets the holding period and other requirements for the dividends received deduction. Dividends paid by the Fund to certain non-corporate U.S. Shareholders (including individuals) are eligible for U.S. federal income taxation at reduced rates generally applicable to long-term capital gains for individuals, provided that the U.S. Shareholder receiving the dividend satisfies applicable holding period and other requirements.

If the amount of the Fund distribution exceeds the Fund's current and accumulated earnings and profits, such excess will be treated first as a tax-free return of capital to the extent of, and in reduction of, the U.S. Shareholder's tax basis in the shares, and thereafter as capital gain. Any such capital gain will be long-term capital gain if such U.S. Shareholder has held the applicable shares for more than one year. The portion of the distribution received by the U.S. Shareholder from the Fund that is treated as a return of capital will decrease the U.S. Shareholder's tax basis in his or her Fund shares (but not below zero), which will result in an increase in the amount of gain (or decrease in the amount of loss) that will be recognized by the U.S. Shareholder for tax purposes on the later sale of such Fund shares. The portion of the Fund's distributions that may be classified as return of capital is uncertain and can be materially impacted by events that are not subject to the control of the Advisor or the Sub-Advisor (e.g., mergers, acquisitions, reorganizations and other capital transactions occurring at the individual MLP level, changes in the tax characterization of distributions received from the MLP investments held by the Fund, or changes in tax laws). Gains and other income realized by the Fund may also cause distributions from the Fund to be treated as taxable dividends rather than as return of capital distributions.

Because of these factors, the portion of the Fund's distributions that is considered return of capital may vary materially from year to year. Accordingly, there is no guarantee that future distributions will maintain the same classification for tax purposes as past distributions.

U.S. Shareholders that receive distributions in shares rather than in cash will be treated for U.S. federal income tax purposes as having (i) received a cash distribution equal to the fair market value of the shares received and (ii) reinvested such amount in shares.

Redemptions. The Fund expects that redemptions of shares will generally be treated as taxable sales or exchanges. A redemption of shares will generally be treated as a taxable sale or exchange of such shares for tax purposes, provided (a) the redemption is not essentially equivalent to a dividend, (b) the redemption is a substantially disproportionate redemption, (c) the redemption is a complete redemption of a shareholder's entire interest in the Fund, or (d) the redeeming shareholder is not a corporation and the redemption is in partial liquidation of the Fund.

Upon a redemption treated as a sale or exchange, a U.S. Shareholder generally will recognize capital gain or loss equal to the difference between the amount received in the redemption and the U.S. Shareholder's adjusted tax basis in the shares. A U.S. Shareholder's adjusted tax basis in its shares may be less than the price paid for the shares as a result of distributions by the Fund in excess of the Fund's current and accumulated earnings and profits (i.e., returns of capital). Any such capital gain or loss will be long-term capital gain or loss if the U.S. Shareholder has held the shares for more than one year at the time of disposition. Long-term capital gains of certain non-corporate U.S. Shareholders (including individuals) are subject to U.S. federal income taxation at reduced rates. The deductibility of capital losses is subject to limitations under the Code. Redemptions that do not qualify for sale or exchange treatment will be treated as described under "Distributions" above.

Medicare Contribution Tax. A 3.8% Medicare contribution tax generally applies to all or a portion of the net investment income of a shareholder who is an individual and not a nonresident alien for federal income tax purposes and who has adjusted gross income (subject to certain adjustments) that exceeds a threshold amount (\$250,000 if married filing jointly or if considered a "surviving spouse" for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts. For these purposes, interest, dividends and certain capital gains (among other categories of income) are generally taken into account in computing a shareholder's net investment income.

Annual tax statement. Each year, the Fund will send you an annual tax statement (Form 1099) of your account activity to assist you in completing your federal, state and local tax returns. When necessary, the Fund will send you a corrected Form 1099 to reflect reclassified information.

UBTI. Under current law, an investment in shares will not generate unrelated business taxable income ("UBTI") for tax-exempt U.S. Shareholders, provided that the tax-exempt U.S. Shareholder does not incur "acquisition indebtedness" (as defined for U.S. federal income tax purposes) with respect to the shares. A tax-exempt U.S. Shareholder would recognize UBTI by reason of its investment in the Fund if the shares constitute debt-financed property in the hands of the tax-exempt U.S. Shareholder.

Tax Certification and Backup Withholding. Tax certification and backup withholding tax laws may require that you certify your tax information when you become an investor in the Fund. For U.S. citizens and resident aliens, this certification is made on IRS Form W-9. Under these laws, the Fund must withhold a portion of your dividends and sales proceeds unless you:

- provide your correct Social Security or taxpayer identification number,
- certify that this number is correct,
- certify that you are not subject to backup withholding, and
- certify that you are a U.S. person (including a U.S. resident alien).

The Fund also must withhold if the IRS instructs it to do so. When withholding is required, the amount will be 28% of any dividends or proceeds paid. Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability, provided the appropriate information is furnished to the IRS. Certain payees and payments are exempt from backup withholding and information reporting. Non-U.S. investors have special U.S. tax certification requirements.

GENERAL INFORMATION

Investment Managers Series Trust is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on February 15, 2005. The Trust has a number of outstanding series of shares of beneficial interest, each of which represents interests in a separate portfolio of securities.

The Trust's Declaration of Trust permits the Trustees to create additional series of shares, to issue an unlimited number of full and fractional shares of beneficial interest of each series, including the Fund and to divide or combine the shares of any series into a greater or lesser number of shares without thereby changing the proportionate beneficial interest in the series. The assets belonging to a series are charged with the liabilities in respect of that series and all expenses, costs, charges and reserves attributable to that series only. Therefore, any creditor of any series may look only to the assets belonging to that series to satisfy the creditor's debt. Any general liabilities, expenses, costs, charges or reserves of the Trust which are not readily identifiable as pertaining to any particular series are allocated and charged by the Trustees to and among the existing series in the sole discretion of the Trustees. Each share of the Fund represents an interest in the Fund proportionately equal to the interest of each other share. Upon the Fund's liquidation, all shareholders would share pro rata in the net assets of the Fund available for distribution to shareholders.

The Trust may offer more than one class of shares of any series. Each share of a series or class represents an equal proportionate interest in that series or class with each other share of that series or class. With respect to the Fund, the Trust offers four classes of shares, Class A Shares, Class C Shares, Class T Shares and Institutional Class Shares. As of the date of this SAI, Class T Shares are not available for purchase. The Trust has reserved the right to create and issue additional series or classes. Each share of a series or class represents an equal proportionate interest in that series or class with each other share of that series or class.

The shares of each series or class participate equally in the earnings, dividends and assets of the particular series or class. Expenses of the Trust, which are not attributable to a specific series or class, are allocated among all the series in a manner believed by management of the Trust to be fair and equitable. Shares issued do not have pre-emptive or conversion rights. Shares when issued are fully paid and non-assessable, except as set forth below. Shareholders are entitled to one vote for each share held. Shares of each series or class generally vote together, except when required under federal securities laws to vote separately on matters that only affect a particular series or class, such as the approval of distribution plans for a particular class.

The Trust is not required to hold annual meetings of shareholders but will hold special meetings of shareholders of a series or class when, in the judgment of the Board, it is necessary or desirable to submit matters for a shareholder vote. Shareholders have, under certain circumstances, the right to communicate with other shareholders in connection with requesting a meeting of shareholders for the purpose of removing one or more trustees. Shareholders also have, in certain circumstances, the right to remove one or more trustees without a meeting. No material amendment may be made to the Trust's Declaration of Trust without the affirmative vote of the holders of a majority of the outstanding shares of each portfolio affected by the amendment.

The Trust's Declaration of Trust provides that, at any meeting of shareholders of the Trust or of any series or class, a shareholder servicing agent may vote any shares as to which such shareholder servicing agent is the agent of record for shareholders who are not represented in person or by proxy at the meeting, proportionately in accordance with the votes cast by holders of all shares of that portfolio otherwise represented at the meeting in person or by proxy as to which such shareholder servicing agent is the agent of record. Any shares so voted by a shareholder servicing agent will be deemed represented at the meeting for purposes of quorum requirements. Any series or class may be terminated (i) upon the merger or consolidation with, or the sale or disposition of all or

substantially all of its assets to, another entity, if approved by the vote of the holders of two-thirds of its outstanding shares, except that if the Board recommends such merger, consolidation or sale or disposition of assets, the approval by vote of the holders of a majority of the series' or class' outstanding shares will be sufficient, or (ii) by the vote of the holders of a majority of its outstanding shares, or (iii) by the Board by written notice to the series' or class' shareholders. Unless each series and class is so terminated, the Trust will continue indefinitely.

Shareholders may send communications to the Board. Shareholders should send communications intended for the Board by addressing the communications to the Board, in care of the Secretary of the Trust and sending the communication to 2220 E. Route 66, Suite 226, Glendora, California 91740. A shareholder communication must (i) be in writing and be signed by the shareholder, (ii) provide contact information for the shareholder, (iii) identify the Fund to which it relates, and (iv) identify the class and number of shares held by the shareholder. The Secretary of the Trust may, in good faith, determine that a shareholder communication should not be provided to the Board because it does not reasonably relate to the Trust or its operations, management, activities, policies, service providers, Board, officers, shareholders or other matters relating to an investment in a series of the Trust or is otherwise immaterial in nature. Other shareholder communications received by the series of the Trust not directly addressed and sent to the Board will be reviewed and generally responded to by management, and will be forwarded to the Board only at management's discretion based on the matters contained therein.

The Declaration of Trust provides that no Trustee or officer of the Trust shall be subject to any personal liability in connection with the assets or affairs of the Trust or any of its series except for losses in connection with his or her willful misfeasance, bad faith, gross negligence or reckless disregard of his or her duties. The Trust has also entered into an indemnification agreement with each of its Trustees which provides that the Trust shall advance expenses and indemnify and hold harmless the Trustee in certain circumstances against any expenses incurred by the Trustee in any proceeding arising out of or in connection with the Trustee's service to the Trust, to the maximum extent permitted by the Delaware Statutory Trust Act, the Securities Act and the 1940 Act, and which provides for certain procedures in connection with such advancement of expenses and indemnification.

The Trust's Declaration of Trust also provides that the Trust shall maintain appropriate insurance (for example, fidelity bonding and errors and omissions insurance) for the protection of the Trust, its shareholders, trustees, officers, employees and agents covering possible tort and other liabilities.

The Declaration of Trust does not require the issuance of stock certificates. If stock certificates are issued, they must be returned by the registered owners prior to the transfer or redemption of shares represented by such certificates.

Rule 18f-2 under the 1940 Act provides that as to any investment company which has two or more series outstanding and as to any matter required to be submitted to shareholder vote, such matter is not deemed to have been effectively acted upon unless approved by the holders of a "majority" (as defined in the rule) of the voting securities of each series affected by the matter. Such separate voting requirements do not apply to the election of Trustees or the ratification of the selection of accountants. The Rule contains special provisions for cases in which an advisory contract is approved by one or more, but not all, series. A change in investment policy may go into effect as to one or more series whose holders so approve the change even though the required vote is not obtained as to the holders of other affected series.

The Trust, the Advisor and the Sub-Advisor have adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These codes of ethics generally permit, subject to certain conditions, personnel of those entities to invest in securities that may be purchased or held by the Fund.

FINANCIAL STATEMENTS

Incorporated by reference herein is the Fund's Annual Report to shareholders for the fiscal year ending November 30, 2016, which includes the "Report of Independent Registered Public Accounting Firm", "Schedule of Investments", "Statement of Assets and Liabilities", "Statement of Operations", "Statement of Changes in Net Assets", "Financial Highlights" and "Notes to Financial Statements". A copy of the Fund's Annual Report can be obtained at no charge by calling 1-800-207-7108 or writing the Fund.

APPENDIX A DESCRIPTION OF SHORT-TERM RATINGS

Standard & Poor's Corporation

A brief description of the applicable Standard & Poor's Corporation ("S&P") rating symbols and their meanings (as published by S&P) follows:

Long-Term Debt

An S&P corporate or municipal debt rating is a current assessment of the creditworthiness of an obligor with respect to a specific obligation. This assessment may take into consideration obligors such as guarantors, insurers or lessees. The debt rating is not a recommendation to purchase, sell or hold a security, inasmuch as it does not comment as to market price or suitability for a particular investor. The ratings are based on current information furnished by the issuer or obtained by S&P from other sources it considers reliable. S&P does not perform an audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended or withdrawn as a result of changes in, or unavailability of, such information, or based on other circumstances. The ratings are based, in varying degrees, on the following considerations:

1. Likelihood of default-capacity and willingness of the obligor as to the timely payment of interest and repayment of principal in accordance with the terms of the obligation;
2. Nature of and provisions of the obligation; and
3. Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Investment Grade

AAA	Debt rated "AAA" has the highest rating assigned by S&P. Capacity to pay interest and repay principal is extremely strong.
AA	Debt rated "AA" has a very strong capacity to pay interest and repay principal and differs from the highest rated issues only in small degree.
A	Debt rated "A" has a strong capacity to pay interest and repay principal although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.
BBB	Debt rated "BBB" is regarded as having an adequate capacity to pay interest and repay principal. Whereas it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for debt in this category than in higher rated categories.

Speculative Grade Rating

Debt rated "BB", "B", "CCC", "CC" and "C" is regarded as having predominantly speculative characteristics with respect to capacity to pay interest and repay principal. "BB" indicates the least degree of speculation and "C" the highest. While such debt will likely have some quality and protective characteristics these are outweighed by major uncertainties or major exposures to adverse conditions.

BB	Debt rated "BB" has less near-term vulnerability to default than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to inadequate capacity to meet timely interest and
----	---

principal payments. The “BB” rating category is also used for debt subordinated to senior debt that is assigned an actual or implied “BBB” rating.

- B Debt rated “B” has a greater vulnerability to default but currently has the capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions will likely impair capacity or willingness to pay interest and repay principal. The “B” rating category is also used for debt subordinated to senior debt that is assigned an actual or implied “BB” or “BB” rating.
- CCC Debt rated “CCC” has a currently identifiable vulnerability to default, and is dependent upon favorable business, financial, and economic conditions to meet timely payment of interest and repayment of principal. In the event of adverse business, financial, or economic conditions, it is not likely to have the capacity to pay interest and repay principal. The “CCC” rating category is also used for debt subordinated to senior debt that is assigned an actual or implied “B” or “B” rating.
- CC The rating “CC” typically is applied to debt subordinated to senior debt that is assigned an actual or implied “CCC” debt rating.
- C The rating “C” typically is applied to debt subordinated to senior debt which is assigned an actual or implied “CCC” debt rating. The “C” rating may be used to cover a situation where a bankruptcy petition has been filed, but debt service payments are continued.
- CI The rating “CI” is reserved for income bonds on which no interest is being paid.
- D Debt rated “D” is in payment default. The “D” rating category is used when interest payments or principal payments are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The “D” rating also will be used upon the filing of a bankruptcy petition if debt service payments are jeopardized.

Plus (+) or Minus (-): The ratings from “AA” to “CCC” may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

Provisional Ratings: The letter “p” indicates that the rating is provisional. A provisional rating assumes the successful completion of the project financed by the debt being rated and indicates that payment of debt service requirements is largely or entirely dependent upon the successful and timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, makes no comment on the likelihood of, or the risk of default upon failure of, such completion. The investor should exercise judgment with respect to such likelihood and risk.

r The letter “r” is attached to highlight derivative, hybrid, and certain other obligations that S&P believes may experience high volatility or high variability in expected returns due to non-credit risks. Examples of such obligations are: securities whose principal or interest return is indexed to equities, commodities, or currencies; certain swaps and options; and interest only and principal only mortgage securities. The absence of an “r” symbol should not be taken as an indication that an obligation will exhibit no volatility or variability in total return.

L The letter “L” indicates that the rating pertains to the principal amount of those bonds to the extent that the underlying deposit collateral is Federally insured by the Federal Savings & Loan Insurance Corporation or the Federal Deposit Insurance Corporation* In the case of certificates of deposit the letter “L” indicates that the deposit, combined with other deposits being held in the same right and capacity will be honored for principal and accrued pre-default interest up to the Federal insurance limits within 30 days after closing of the insured institution or, in the event that the deposit is assumed by a successor insured institution, upon maturity.

NR Indicates no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular type of obligation as a matter of policy.

Commercial Paper

An S&P commercial paper rating is a current assessment of the likelihood of timely payment of debt having an original maturity of no more than 365 days. Ratings are graded into several categories, ranging from "A-1" for the highest quality obligations to "D" for the lowest. These categories are as follows:

A-1 This highest category indicates that the degree of safety regarding timely payment is strong. Those issues determined to possess extremely strong safety characteristics are denoted with a plus sign (+) designation.

A-2 Capacity for timely payment on issues with this designation is satisfactory. However, the relative degree of safety is not as high as for issues designated "A-1."

* Continuance of the rating is contingent upon S&P's receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flow.

A-3 Issues carrying this designation have adequate capacity for timely payment. They are, however, somewhat more vulnerable to the adverse effects of changes in circumstances than obligations carrying the higher designations.

B Issues rated "B" are regarded as having only speculative capacity for timely payment.

C This rating is applied to short-term debt obligations with a doubtful capacity for payment.

D Debt rated "D" is in payment default. The "D" rating category is used when interest payments or principal Payments are not made on the date due, even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period.

A commercial rating is not a recommendation to purchase, sell or hold a security inasmuch as it does not comment as to market price or suitability for a particular investor. The ratings are based on current information furnished to S&P by the issuer or obtained by S&P from other sources it considers reliable.

S&P does not perform an audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended or withdrawn as a result of changes in or unavailability of such information or based on other circumstances.

Preferred Securities

AAA This is the highest rating that may be assigned to a preferred stock issue and indicates an extremely strong capacity to pay the preferred stock obligations.

AA A preferred stock issue rated AA also qualifies as a high quality fixed income security. The capacity to pay preferred stock obligations is very strong, although not as overwhelming as for issues rated AAA.

A An issue rated A is backed by a sound capacity to pay the preferred stock obligations, although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions.

BBB An issue rated BBB is regarded as backed by an adequate capacity to pay preferred stock obligations. Although it normally exhibits adequate protection parameters, adverse economic

conditions or changing circumstances are more likely to lead to a weakened capacity to make payments for preferred stock in this category for issues in the A category.

BB As issue rated BB is regarded, on balance, as predominantly speculative with respect to the issuer's capacity to pay the preferred stock obligation. While such issues will likely have some quality and protective characteristics, they are outweighed by large uncertainties or major risk exposures to adverse conditions.

Moody's Investors Service, Inc.

A brief description of the applicable Moody's Investors Service, Inc. ("Moody's") rating symbols and their meanings (as published by Moody's) follows:

Long-Term Debt

The following summarizes the ratings used by Moody's for corporate and municipal long-term debt:

- Aaa Bonds are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issuer.
- Aa Bonds are judged to be of high quality by all standards. Together with the "Aaa" group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in "Aaa" securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in "Aaa" securities.
- A Bonds possess many favorable investment attributes and are to be considered as upper medium-grade obligations. Factors giving security to principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment sometime in the future.
- Baa Bonds considered medium-grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.
- Ba, B, Caa, Ca, and C Bonds that possess one of these ratings provide questionable protection of interest and principal ("Ba" indicates some speculative elements; "B" indicates a general lack of characteristics of desirable investment; "Caa" represents a poor standing; "Ca" represents obligations which are speculative in a high degree; and "C" represents the lowest rated class of bonds). "Caa," "Ca" and "C" bonds may be in default.
- Con. (---) Bonds for which the security depends upon the completion of some act or the fulfillment of some condition are rated conditionally. These are bonds secured by (a) earnings of projects under construction, (b) earnings of projects unseasoned in operation experience, (c) rentals which begin when facilities are completed, or (d) payments to which some other limiting condition attaches. Parenthetical rating denotes probable credit stature upon completion of construction or elimination of basis of condition.
- (P) When applied to forward delivery bonds, indicates that the rating is provisional pending delivery of the bonds. The rating may be revised prior to delivery if changes occur in the legal documents or the underlying credit quality of the bonds.

Note: Those bonds in the Aa, A, Baa, Ba and B groups which Moody's believes possess the strongest investment attributes are designated by the symbols, Aa1, A1, Ba1 and B1.

Short-Term Loans

MIG 1/VMIG 1 This designation denotes best quality. There is present strong protection by established cash flows, superior liquidity support or demonstrated broad based access to the market for refinancing.

MIG 2/VMIG 2 This designation denotes high quality. Margins of protection are ample although not so large as in the preceding group.

MIG 3/VMIG 3 This designation denotes favorable quality. All security elements are accounted for but there is lacking the undeniable strength of the preceding grades. Liquidity and cash flow protection may be narrow and market access for refinancing is likely to be less well-established.

MIG 4/VMIG 4 This designation denotes adequate quality. Protection commonly regarded as required of an investment security is present and although not distinctly or predominantly speculative, there is specific risk.

S.G. This designation denotes speculative quality. Debt instruments in this category lack margins of protection.

Commercial Paper

Issuers rated Prime-1 (or related supporting institutions) have a superior capacity for repayment of short-term promissory obligations. Prime-1 repayment capacity will normally be evidenced by the following characteristics:

- Leading market positions in well-established industries.
- High rates of return on Funds employed.
- Conservative capitalization structures with moderate reliance on debt and ample asset protection.
- Broad margins in earnings coverage of fixed financial charges and high internal cash generation.
- Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated Prime-2 (or related supporting institutions) have a strong capacity for repayment of short-term promissory obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, will be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained. Issuers rated Prime-3 (or related supporting institutions) have an acceptable capacity for repayment of short-term promissory obligations. The effect of industry characteristics and market composition may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and the requirement for relatively high financial leverage. Adequate alternate liquidity is maintained.

Issuers rated Not Prime do not fall within any of the Prime rating categories.

Preferred Securities Ratings

- aaa Preferred stocks which are rated “aaa” are considered to be top quality. This rating indicates good asset protection and the least risk of dividend impairment within the universe of preferred stocks.
- aa Preferred stocks which are rated “aa” are considered to be high grade. This rating indicates that there is reasonable assurance that earnings and asset protection will remain relatively well maintained in the foreseeable future.
- a Preferred stocks which are rated “a” are considered to be upper-medium grade. While risks are judged to be somewhat greater than in the “aaa” and “aa” classifications, earnings and asset protection are, nevertheless, expected to be maintained at adequate levels.
- baa Preferred stocks which are rated “baa” are judged lower-medium grade, neither highly protected nor poorly secured. Earnings and asset protection appear adequate at present but may be questionable over any great length of time.
- ba Preferred stocks which are rated “ba” are considered to have speculative elements and their future cannot be considered well assured. Earnings and asset protection may be very moderate and not well safeguarded during adverse periods. Uncertainty of position characterizes preferred stocks in this class.

**APPENDIX B
PROXY VOTING POLICIES AND PROCEDURES**

**SUB-ADVISOR'S PROXY VOTING POLICIES AND GUIDELINES
CENTER COAST CAPITAL ADVISORS, LP**

POLICY

It is the Firm's policy to accept responsibility to vote proxies on behalf of clients and to vote such proxies in the best interest of its clients and ensure that the vote is not the product of an actual or potential conflict of interest.

RESPONSIBILITY

Where the Firm has accepted responsibility to vote proxies on behalf a particular client, the Chief Investment Officer is responsible for ensuring that proxies are voted in a manner consistent with the proxy voting guidelines adopted by the Firm (the "Proxy Voting Guidelines") and the Firm's policies and procedures.

PROCEDURES

The Firm will only cast proxy votes in a manner consistent with the best interest of its clients or, to the extent applicable, their beneficiaries. Absent special circumstances, which are further discussed below, all proxies will be voted consistent with the guidelines attached to the Compliance Manual on Exhibit E ("Proxy Voting Guidelines") and the Firm's policies and procedures. The Firm shall, in its Form ADV, generally disclose to clients information about these policies and procedures and how clients may obtain information on how the Firm voted their proxies when applicable. At any time, a client may contact the Firm to request information about how it voted proxies for their securities. It is generally the Firm's policy not to disclose its proxy voting records to unaffiliated third parties or special interest groups.

The Firm's Proxy Voting Committee will be responsible for monitoring corporate actions, making proxy voting decisions, and ensuring that proxies are submitted in a timely manner. The Proxy Voting Committee may delegate the responsibility to vote client proxies to one or more persons affiliated with the Firm (such person(s) together with the Proxy Voting Committee are hereafter collectively referred to as "Responsible Voting Parties") consistent with the Proxy Voting Guidelines. Specifically, when the Firm receives proxy proposals where the Proxy Voting Guidelines outline its general position as voting either "for" or "against," the proxy will be voted by one of the Responsible Voting Parties in accordance with the Firm's Proxy Voting Guidelines. When the Firm receives proxy proposals where the Proxy Voting Guidelines do not contemplate the issue or otherwise outline its general position as voting on a case-by-case basis, the proxy will be forwarded to the Proxy Voting Committee, which will review the proposal and either vote the proxy or instruct one of the Responsible Voting Parties on how to vote the proxy.

It is intended that the Proxy Voting Guidelines will be applied with a measure of flexibility. Accordingly, except as otherwise provided in these policies and procedures, the Responsible Voting Parties may vote a proxy contrary to the Proxy Voting Guidelines if, in the sole determination of the Proxy Voting Committee, it is determined that such action is in the best interest of the Firm's clients. In the exercise of such discretion, the Proxy Voting Committee may take into account a wide array of factors relating to the matter under consideration, the nature of the proposal, and the company involved. Similarly, poor past performance, uncertainties about management and future directions, and other factors may lead to a conclusion that particular proposals by an issuer present unacceptable investment risks and should not be supported. In addition, the proposals should be evaluated in context. For example, a particular proposal may be acceptable standing alone, but objectionable when part of an existing or proposed package, such as where the effect may be to entrench management. Special circumstances or instructions from clients may also justify casting different votes for different clients with respect to the same proxy vote.

The Responsible Voting Parties will document the rationale for all proxy voted contrary to the Proxy Voting Guidelines. Such information will be maintained as part of the Firm's recordkeeping process. In performing its

responsibilities the Proxy Voting Committee may consider information from one or more sources including, but not limited to, management of the company presenting the proposal, shareholder groups, legal counsel, and independent proxy research services. In all cases, however, the ultimate decisions on how to vote proxies are made by the Proxy Voting Committee.

Conflicts of Interest

The Firm may occasionally be subject to conflicts of interest in the voting of proxies due to business or personal relationships it maintains with persons having an interest in the outcome of certain votes. For example, the Firm may provide services to accounts owned or controlled by companies whose management is soliciting proxies. The Firm, along with any affiliates and/or employees, may also occasionally have business or personal relationships with other proponents of proxy proposals, participants in proxy contests, corporate directors, or candidates for directorships.

If the Responsible Voting Parties become aware of any potential or actual conflict of interest relating to a particular proxy proposal, they will promptly report such conflict to the Committee. Conflicts of interest will be handled in various ways depending on their type and materiality of the conflict. The Firm will take the following steps to ensure that its proxy voting decisions are made in the best interest of its clients and are not the product of such conflict:

- Where the Proxy Voting Guidelines outline the Firm's voting position, as either "for" or "against" such proxy proposal, voting will be accordance with the its Proxy Voting Guidelines.
- Where the Proxy Voting Guidelines outline the Firm's voting position to be determined on a "case-by-case" basis for such proxy proposal, or such proposal is not contemplated in the Proxy Voting Guidelines, then one of the two following methods will be selected by the Committee depending upon the facts and circumstances of each situation and the requirements of applicable law:
 - o Voting the proxy in accordance with the voting recommendation of a non-affiliated third party vendor; or
 - o Provide the client with sufficient information regarding the proxy proposal and obtain the client's consent or direction before voting.

Third Party Delegation

The Firm may delegate to a non-affiliated third party vendor the responsibility to review proxy proposals and make voting recommendations to the Firm. The Chief Investment Officer will ensure that any third party recommendations followed will be consistent with the Proxy Voting Guidelines. In all cases, however, the ultimate decisions on how to vote proxies are made by the Committee.

Mutual Funds

In the event that the Firm acts as investment adviser to a closed-end and/or open-end registered investment company and is responsible for voting their proxies, such proxies will be voted in accordance with any applicable investment restrictions of the fund and, to the extent applicable, any resolutions or other instructions approved by an authorized person of the fund.

Special Circumstances

The Firm may choose not to vote proxies in certain situations or for certain accounts, such as: (i) where the Firm deems the cost of voting the proxy would exceed any anticipated benefit to the client; (ii) where a proxy is received for a client that has terminated the Firm's services; (iii) where a proxy is received for a security that the Firm no longer manages (i.e., the Firm had previously sold the entire position); and/or (iv) where the exercise of voting rights could restrict the ability of an account's portfolio manager to freely trade the security in question (as is the case, for example, in certain foreign jurisdictions known as "blocking markets").

In addition, certain accounts over which the Firm has proxy-voting discretion may participate in securities lending programs administered by the custodian or a third party. Because title to loaned securities passes to the borrower, the Firm will be unable to vote any security that is out on loan to a borrower on a proxy record date. If the Firm has investment discretion, however, the Firm shall reserve the right to instruct the lending agent to

terminate a loan in situations where the matter to be voted upon is deemed to be material to the investment and the benefits of voting the security are deemed to outweigh the costs of terminating the loan.

BOOKS AND RECORDS

In its books and records, the Firm will maintain a copy of the following documents:

- Proxy statement that the Firm receives regarding client's securities;
- Votes that the Firm casts on behalf of a client;
- Any document the Firm created that was material to making a decision on how to vote proxies on behalf of a client or that memorialize the basis for such decision; and
- Written client request for information on how the Firm voted proxies on behalf of the requesting client and a copy of the Firm's written response to any (written or verbal) client request for information on how the Firm voted proxies on behalf of the requesting client.

Exhibit E: Proxy Voting Guidelines

GENERAL POSITION	ISSUE
Directors, Executives & Employees	
F	Uncontested Election of Director (Against for cause)
C	Contested Election of Director
F	Majority of Independent Directors
F	Board Committee membership exclusively of independent Directors
A	Directors required to own a minimum amount of company stock
A	Limit tenure of all Directors
F	Mandatory retirement age for all directors
F	D & O indemnification
A	Re-price management options
C	Stock based compensation for Directors
F	Employee stock purchase plans
F	Disclosure of Executive and Director pay
F	Shareholder ratification of golden parachutes
F	Shareholder approval to implement ESOP
F	401(k) savings plans for employees
C	Executive and Director compensation plans
C	Expensing Stock Options
C	Board Chairmanship independent of company management
Proxies & Tenders	
A	Staggered or classified boards
F	Annual election of all directors
F	Shareholder ability to remove directors with or without cause
F	Shareholders electing directors to fill board vacancies
F	Cumulative Voting
A	Restriction of Shareholder ability to call special meetings
F	Shareholder's rights to act independent of management
F	Fixed size board
A	Management ability to alter size of board without shareholder approval
F	Submission of poison pill for shareholder ratification (for submission in order to vote against poison pill)
C	Redemption of poison pill
C	Fair price provisions

A	Supermajority for any significant issue
A	Annual option grants where total is more than 2% shares outstanding
C	Option grants where total is less than 2% shares outstanding
A	Instituting poison pills
F	Anti-greenmail charter or by-law amendments or other such restrictions
A	Dual class exchange offers or recaps or increases in authorized shares
T	Tender offers

INVESTMENT MANAGERS SERIES TRUST

PROXY VOTING POLICIES AND PROCEDURES

Investment Managers Series Trust (the “Trust”) is registered as an open-end investment company under the Investment Company Act of 1940, as amended (“1940 Act”). The Trust offers multiple series (each a “Fund” and, collectively, the “Funds”). Consistent with its fiduciary duties and pursuant to Rule 30b1-4 under the 1940 Act (the “Proxy Rule”), the Board of Trustees of the Trust (the “Board”) has adopted this proxy voting policy on behalf of the Trust (the “Policy”) to reflect its commitment to ensure that proxies are voted in a manner consistent with the best interests of the Funds’ shareholders.

Delegation of Proxy Voting Authority to Fund Advisors

The Board believes that the investment advisor of each Fund (each an “Advisor” and, collectively, the “Advisors”), as the entity that selects the individual securities that comprise its Fund’s portfolio, is the most knowledgeable and best-suited to make decisions on how to vote proxies of portfolio companies held by that Fund. The Trust shall therefore defer to, and rely on, the Advisor of each Fund to make decisions on how to cast proxy votes on behalf of such Fund.

The Trust hereby designates the Advisor of each Fund as the entity responsible for exercising proxy voting authority with regard to securities held in the Fund’s investment portfolio. Consistent with its duties under this Policy, each Advisor shall monitor and review corporate transactions of corporations in which the Fund has invested, obtain all information sufficient to allow an informed vote on all proxy solicitations, ensure that all proxy votes are cast in a timely fashion, and maintain all records required to be maintained by the Fund under the Proxy Rule and the 1940 Act. Each Advisor shall perform these duties in accordance with the Advisor’s proxy voting policy, a copy of which shall be presented to this Board for its review. Each Advisor shall promptly provide to the Board updates to its proxy voting policy as they are adopted and implemented.

Availability of Proxy Voting Policy and Records Available to Fund Shareholders

If a Fund or an Advisor has a web site, a copy of the Advisor’s proxy voting policy and this Policy may be posted on such website. A copy of such policies and of each Fund’s proxy voting record shall also be made available, without charge, upon request of any shareholder of the Fund, by calling the applicable Fund’s toll-free telephone number as printed in the Fund’s prospectus. The Trust’s administrator shall reply to any Fund shareholder request within three business days of receipt of the request, by first-class mail or other means designed to ensure equally prompt delivery.

Each Advisor shall provide a complete voting record, as required by the Proxy Rule, for each series of the Trust for which it acts as advisor, to the Trust’s co-administrator within 30 days after June 30 of each year. The Trust’s co-administrator, MFAC will file a report based on such record on Form N-PX on an annual basis with the Securities and Exchange Commission no later than August 31st of each year.
